What do you like most about school and why?

Have you ever said that you hated going to school? I know I have, but there are some reasons that I like going to school. I can see my friends, I learn new things everyday, & I like going to Language Arts and Math class.

One reason I like to go to school is so that I can see my friends. If I didn't get to see my friends at school then I probably wouldn't hardly ever see them at all.

Another reason why I like school is, I learn so many new things. Like how to write essays, what a DNA molecule looks like, and who was the leader of the Federalist party when John Adams was president.

My final reason for liking school is just that I like Language Arts and Math class so much. Language Arts is fun because I like to write essays and do activities with verbs. I like Math because it is easy for me to understand and it is fun to try and figure out so many math problems.

Have you ever said you hated school? If so, maybe you can change your mind by thinking of things you like about school. Such as: seeing your friends, learning new things, and knowing more about your favorite subject or subjects.
