Adolescent pregnancy rates are the sum of live births, reported fetal deaths, and induced abortions per 1,000 female population in that age group.  
 \*Rate not calculated when the female population in the age group is less than 100. A dash (-) indicates there were no pregnancies.

**NUMBERS, RATES, AND PERCENTAGES FOR ADOLESCENTS (10-17), BY RACE, RESIDENT DATA, TENNESSEE**

\*Total includes population to other racial groups or race not stated.

#Note: Tennessee population estimates used to calculate the rates in this report were based on estimates and projections prepared from the 2000 census data for 1991-2000 and 2000-2010 by the Division of Health Statistics in August 2003 and revised in February 2008. The population estimates for 2010 were based on the 2010 Census data. These population figures may result in rates that differ from or may be somewhat disjointed from those rates previously published.
