Executive Summary

The Kindergarten Immunization Compliance Assessment (i.e., Kindergarten Assessment) is an annual assessment completed by the Tennessee Department of Health's (TDH) Vaccine-Preventable Diseases and Immunization Program (VPDIP) in collaboration with the Tennessee Department of Education (TDOE) and Tennessee (TN) public and private schools.

The goal of the assessment is to evaluate immunization coverage and exemption levels of state-required vaccines among children entering kindergarten. Children entering kindergarten in TN must be up-to-date with the following vaccines at the time of enrollment:

- **Diphtheria-Tetanus-Pertussis vaccine (DTaP)**¹
- **Hepatitis A Virus vaccine (HAV)**²
- **Poliomyelitis vaccine (IPV or OPV)**
- **Measles, Mumps, Rubella vaccine (MMR)**
- **Hepatitis B Virus vaccine (HBV)**
- **Varicella (chickenpox) vaccine/credible history of disease**

All required immunizations must be documented on the Tennessee Official Immunization Certificate. Immunizing providers are also strongly encouraged to record immunizations in the Tennessee Immunization Information System (TennIIS). The state recognizes five different types of immunization certificates and exemptions:

Complete: All vaccination requirements completed according to the CDC immunization schedule.

Temporary: A temporary immunization certificate is issued when a child has not received all required vaccines but is in the process of completing them. A temporary certificate expires one month after the date that the next required immunization is due, according to the minimum acceptable ("catch-up") dose interval per the CDC/ACIP schedule.³ An expired temporary immunization certificate is not valid proof of immunization. Students with an expired temporary certificate are classified as having an incomplete vaccine record.

Transfer: Child has recently transferred from out-of-state and is in the process of obtaining the Tennessee Official Immunization Certificate

Religious Exemption: This exemption requires a signed statement by the parent/guardian that vaccination conflicts with their religious tenets or practices. If the child needs documentation of a health examination for the school, the claimed religious exemption must be noted by the healthcare provider on the immunization certificate. It should be noted that none of the major Christian denominations, including Roman Catholic, Baptist, Methodist, Episcopalian, Presbyterian, Lutheran, Pentecostal, Church of Jesus Christ of Latter-Day Saints, Eastern Orthodox, Jehovah's Witness, Mennonite, Quaker, and Unitarian-Universalist object to immunizations. Similarly, Judaism, Islam, Hinduism, Jainism, and Scientology also have no objection to immunizations. The number of religious exemptions in the state of Tennessee is likely due to parents filing a religious exemption in lieu of a personal philosophical exemption, despite the Tennessee Code Annotated stating that doing so is subject to penalty of perjury.⁴

Medical Exemption: Physician (MD, DO) or department Public Health Nurse authorized to indicate specific vaccines medically exempted (because of risk of harm), preferably on the TDH medical exemption form. on the new form. Other vaccines remain required. The medical reason for the exemption does not need to be provided.

Children who have incomplete or missing documentation of childhood immunizations are not permitted to attend public school per T.C.A. § 49-6-5001

¹ Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated

Assessment Process

Tennessee uses a census-based approach to collect immunization data for the Kindergarten Assessment. All public schools with kindergarten students enrolled at the time of the assessment are asked to report assessment results, with the exception of public schools where the students must be tested to determine grade level and programs that are distance learning only. Additionally, all TDOE-accredited private schools in Categories 1, 1-SP, 2, and 3 that have kindergarten students enrolled at the time of the assessment are asked to report assessment results. For a description of private school categories please visit <https://www.tn.gov/education/school-options/non-public-schools/non-public-school-categories.html>. School nurses and/or other trained school personnel review students' immunization certificates and report aggregate, de-identified data to VPDIP for each school year. To validate schools' self-reported results, a sample of public and private schools are randomly selected by the Centers for Disease Control and Prevention (CDC) statisticians and audited every spring. Statewide results are published on the TDH website⁵, shared with TDOE and school districts, and published on the CDC SchoolVaxView website⁶.

2020-2021 School Year Statewide Summary

Statewide, 95.2% of all kindergarten students were fully immunized at the time of survey completion. Of the students who were not fully immunized, 1.0% had a temporary immunization certificate on file, 1.8% had a religious exemption on file, 0.1% of students had a medical exemption on file, 1.3% had an incomplete immunization record, and 0.5% were missing an immunization record.

If a student had a valid temporary certificate, a medical exemption, or an incomplete immunization record, schools were asked to report which individual vaccine series the student had completed. Figure 1 shows the percentage of public and private school students who were complete for each vaccine series. Note: The percentages in Figure 1 reflect the sum of public and private school kindergarten students who were complete for an individual vaccine series, regardless of whether they had received all the vaccines required for school enrollment.

⁶ <https://www.cdc.gov/vaccines/imz-managers/coverage/schoolvaxview/data-reports/coverage-trend/index.html>

Figure 1. Percentage of public and private school kindergarten students who were complete for each vaccine series, compared to Healthy People 2020 (HP 2020) goal of 95% complete

Public Schools Statewide Summary

Of the 1,049 public schools that were asked to complete the 2020-2021 Kindergarten Assessment 1,010 (96%) submitted results. Statewide, 95.4% of public school students were fully immunized at the time of the survey (66,760 of 69,980 students). Of all public school students, 71.2% (n=49,849) had their immunization record completed and validated in TennIIS. Students who were not fully immunized fell into the following categories, in decreasing order of prevalence:

- Religious Exemption: 1.7% (n=1,177)
- Incomplete Record: 1.2% (n=870)
- Temporary Certificate: 1.0% (n=706)
- Missing Record: 0.5% (n=322)
- Medical Exemption: 0.1% (n=84)
- Transfer <30 days: 0.1% (n=62)

Private Schools Statewide Summary

A total of 176 private schools (out of 295 schools; 61%) with kindergarten enrollment completed the 2020-2021 Kindergarten Assessment. This represents a 10% decline in school participation compared to that of the 2019-2020 Kindergarten Assessment when 71% of private schools participated. We suspect resource burdens caused by the SARS-CoV-2 pandemic contributed to this decline. Statewide, 92.3% (3,550 of 3,848 students) of private school kindergarten students were fully immunized, which represents a 1.5% decrease in the fully-immunized rate from the previous year. Unlike the public school 2020-2021 Kindergarten Assessment, the private school

survey does not ascertain how many private school students had immunization certificates that were validated by TennIIS. Students who were not fully immunized fell into the following categories, in decreasing order of prevalence:

- Religious Exemption: 4.0% (n=155)
- Incomplete Record: 2.3% (n=90)
- Missing Record: 1.0% (n=37)
- Temporary Certificate: 0.7% (n=27)
- Medical Exemption: 0.1% (n=3)
- Transfer <30 days: N/A for private schools based on data collection methods

Trends over Time

Kindergarten student enrollment decreased by nearly 10% in 2020-2021, resulting in 73,828 total students surveyed in the Kindergarten Assessment. Enrollment shifted slightly towards private schools, with approximately 5.2% of the state's total kindergarten enrollment being in private schools compared to 4% last year. The percentage of public and private school students who received all vaccines per Tennessee's state requirements for kindergarten entry (i.e., were "fully immunized") has consistently been close to 95% over the past five years (range: 94.8% to 95.3%). For a community to remain at low-risk for a highly infectious vaccine-preventable disease outbreak such as measles or pertussis, this rate must remain above 95%. Although Tennessee continues to rank just above this threshold statewide, there has been a substantial decline in the number of counties that meet this minimum threshold for vaccine-preventable disease immunity. In fact, the number of counties with public schools that meet the minimum threshold of 95% fully-immunized threshold has decreased from 87 to 72 counties representing a decrease of 5.3%. Overall, the number of exemptions has remained relatively consistent over the past five years. For the past four years, temporary records have increased slowly while incomplete records have declined proportionally. This year, these two categories reversed course with temporary certificates decreasing by 0.9% and incomplete records increasing by 0.5%. Although both record types include children who are missing vaccinations, temporary certificates expire one month after the date that the next required immunization(s) is(are) due which indicates they are at least on track to being fully-immunized. We suspect this uncharacteristic trend to be the result of school shutdowns and administrative burden caused by the pandemic. Regardless of the cause more incomplete records indicates unvaccinated children have fallen behind and need to catch-up on their immunizations. Furthermore, the increasing number of kindergarteners who are not fully-immunized indicates Tennessee schools and communities may be more susceptible to vaccine-preventable disease outbreaks.

Impact of COVID Pandemic

The CDC noted a decline in overall vaccination rates as soon as one week after the United States declared a national state of emergency due to the SARS-CoV-2 pandemic. The 2020-2021 Kindergarten Immunization Compliance Assessment Report was conducted from November 2020 to February 2021 and affords a unique opportunity to document the impact of the pandemic upon childhood immunization rates in Tennessee. While the overall decline in enrollment was almost certainly the result of pandemic restrictions it is unclear if the same forces contributed to the slight (1.2%) shift in enrollment towards private schools. More granular analysis of the 2020-2021 data showed an 8% increase in counties with public schools that fall below the 95% fully-immunized threshold. This is concerning because only 38% of counties with private school responses exceed 95% of students fully immunized and another 38% failed to achieve even 90% of their students fully immunized. Furthermore, the number of religious exemptions in private schools rose by 1.3% while public school religious exemptions experienced almost no change. These communities are at increased risk of vaccine-preventable disease outbreaks. Data for this report does not reflect the full impact of the pandemic upon kindergarten

immunization rates. Immediate action to increase compliance with recommended childhood immunizations is necessary to decrease the risk of future vaccine-preventable disease outbreaks in our schools in communities.

The percentage of public school students with immunization records documented in TennIIS rose from 43.4% in the 2015-2016 school year to 71.2% in the 2020-2021 school year: a 28% increase in just five years. This significant increase is attributed to the efforts of the VPDIP program to increase TennIIS participation among immunizing providers and school nurses statewide.

Figure 2. Percentage of public-school students fully immunized, and percentage of public school students whose immunization records were complete in TennIIS, over time

The percentage of all TN kindergarten students who were not fully immunized, by category, over time, are shown in **Figure 3**. Over the past five years, the percentage of students with an incomplete immunization record decreased until 2020. (see Figure 3, gold line). This change may be due to disruptions caused by the SARS-CoV-2 pandemic, which created barriers to obtaining immunizations as well as administrative challenges in the schools responsible for enforcing the state’s immunization requirements. Until this year, the percentage of children with a temporary immunization certificate had been increasing (see Figure 3, blue line). This change could be due to

children who may have otherwise been provided a temporary certificate in 2020, who were instead allowed to attend school with an incomplete record. Again, this is likely a reflection of the burden the SARS-CoV-2 pandemic placed upon schools during the academic year. The percentage of students claiming a religious exemption remained relatively unchanged from 2019 to 2020, with 1.8% of children having a religious exemption to immunizations on file. The percentage of kindergarten students claiming medical exemptions from a vaccine remained stable at approximately 0.1% each year (see Figure 3, grey line). This rate is also consistent with the national rate of medical exemptions. The percentage of students with missing vaccine records has also remained stable at approximately 0.5% (not shown in figure).

Figure 3. Percentage of all TN kindergarten students not fully immunized, by category, over time

For Tennessee to remain free of vaccine-preventable disease outbreaks, action is needed to provide missed immunizations to children and ensure that public schools are following state immunization requirements.

Medical providers who deliver health care to children are encouraged to review immunization records and provide catch-up immunizations at every opportunity. Thank you for partnering to protect public health in Tennessee.

Questions and comments regarding this report or the Kindergarten Assessment may be directed to School.Imm@tn.gov.

2020-2021 Kindergarten Immunization Compliance Assessment Results

Public Health Regions Summary

The percentage of public school students fully immunized across Tennessee’s public health regions ranged from 91% to 97%, with Chattanooga/Hamilton Region having the lowest percentage of fully immunized students and North East and West Tennessee Regions having the highest percentage of fully immunized students during the 2020-2021 school year (see Figure 4). **Figure 5** displays the percentage of public-school students who had a temporary certificate, a religious exemption, an incomplete record, or had a medical exemption, across Tennessee’s public health regions.

Figure 4. Percentage of public-school students fully immunized, the number of public-school students fully immunized, and the number of students not fully immunized, by public health region during the 2020-2021 school year

Figure 5. Percentage of **public-school** students with a temporary/transfer immunization record, religious exemption, incomplete/missing record, or medical exemption, by public health region during the 2020-2021 school year.

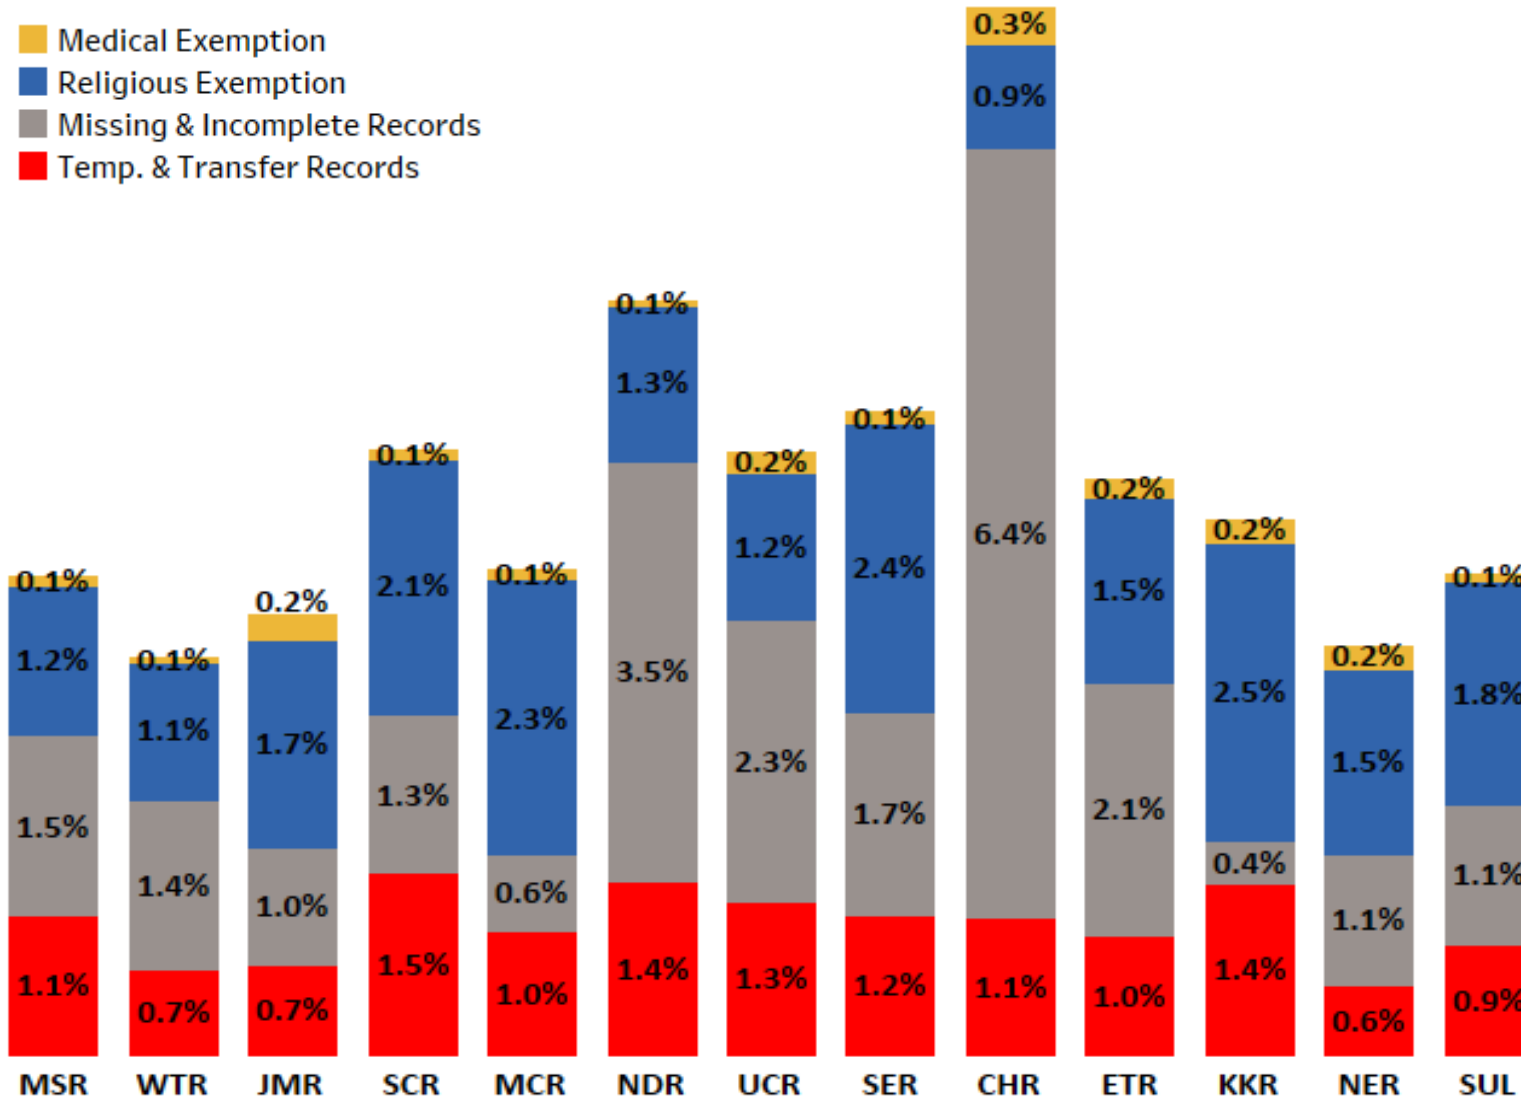

Figure 7. Percentage of **public-school** students fully immunized, by county

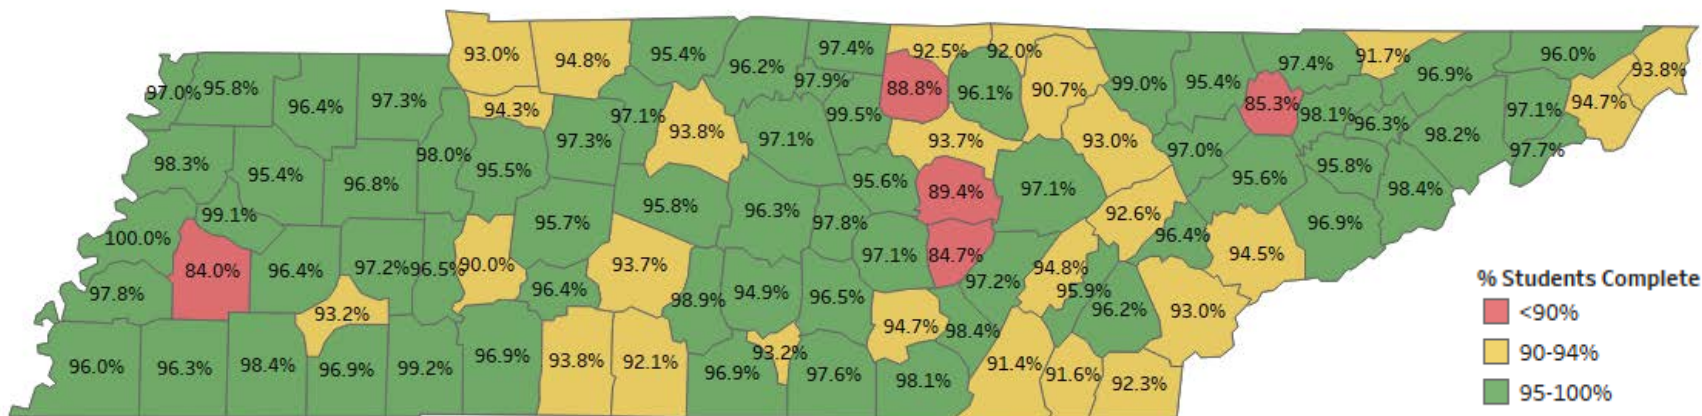

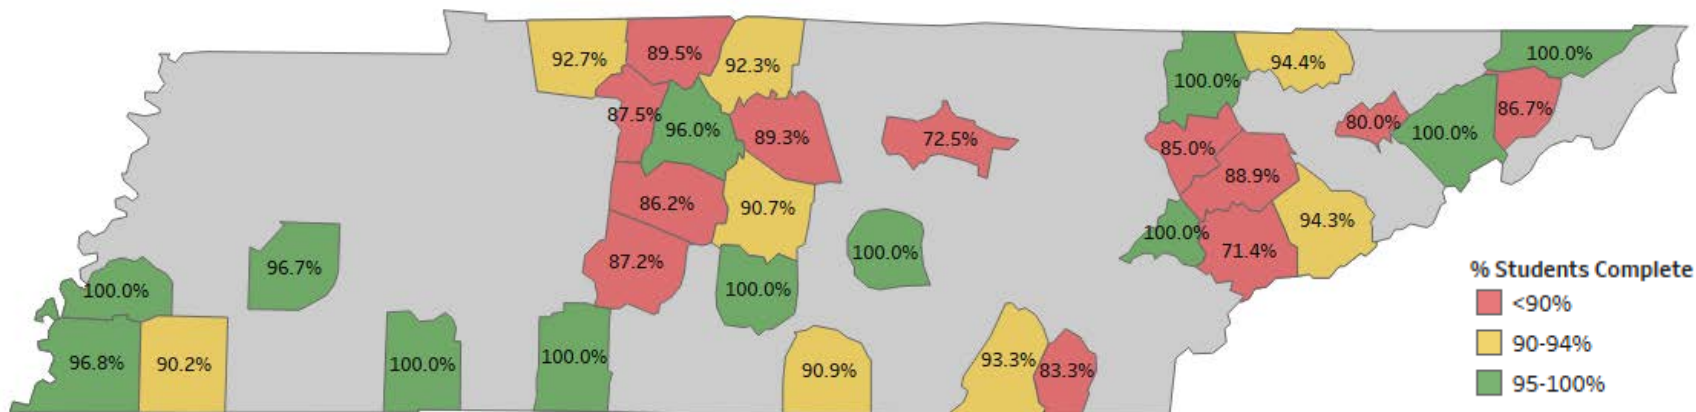

Figure 8. Percentage of **private-school** students fully immunized, by county (**Note:** 176 out of 295 schools completed the 2020-2021 Kindergarten Assessment; this may influence the percentage of students fully immunized within each county)

High immunization coverage rates are critical to avoiding vaccine-preventable disease (VPD) outbreaks (e.g., measles, pertussis). A VPD outbreak may occur when community members are inadequately immunized against a disease. To remain at low risk for a VPD outbreak the immunization rate should remain at or above 95%. In the maps above and tables below, an immunization rate of at least 95% meets this immunization goal, an immunization rate of 90% to 94.9% needs improvement, and an immunization rate below 90% places the community at increased risk for vaccine-preventable disease outbreaks.

For detailed Kindergarten Assessment results at the county, school districts, and school levels, please see the *Public School Districts (SD) by County Summary* section below.

Table 1. Percentage of **public and private school** students fully immunized, total # students, and the number of schools with students fully immunized within each color category, by county, in descending order by “% students fully immunized” (Color Key: <90%; 90-94.9%; 95-100%)

Public and Private School Summaries by County and School District

The following series of tables and graphs capture information at two different levels: 1) at the county-level, featuring information for both public and private schools within the county; and 2) at the school district level, featuring information for all schools within the school district. Data are presented by county in alphabetical order, with school districts nested under each respective county in alphabetical order, and schools nested under each respective school district in alphabetical order.

Below are descriptions of each vaccine type shown in the county tables and graphs.

- Diphtheria-Tetanus-Pertussis vaccine (DTaP)⁷
- Hepatitis A Virus vaccine (HAV)⁸
- Poliomyelitis vaccine (IPV or OPV)
- Measles, Mumps, Rubella vaccine (MMR)
- Hepatitis B Virus vaccine (HBV)
- Varicella (chickenpox) vaccine (or credible history of disease)

Below are descriptions of each category shown in the county tables and graphs. All table percentages on a given row are the percentage of the “Total Students” number on that row.

County	Tennessee county name. School districts are grouped into their corresponding county.
School District	Department of Education school district name. Schools are grouped into their corresponding school district. Private schools are listed under a “private” district name within each county where applicable.
School Name	School name, listed alphabetically within each school district.
Total Students	Total number of enrolled kindergarten students at the time of immunization record assessment.
Fully Immunized	Number and percentage who meet state school entry requirements by being fully immunized.
Religious Exemption	Number and percentage with a valid religious exemption.
Medical Exemption	Number and percentage with a valid medical exemption to one or more vaccines.
Temporary Certificate	Number and percentage with a valid temporary certificate.
Excluded Transfer	Students exempt from assessment because records are unavailable due to a recent transfer from another TN school (within 30 days of the assessment). N/A for private schools based on data collection methods.
Incomplete Record	Number and percentage who do not meet requirements because they have an incomplete vaccination record.
Missing Record	Number and percentage who do not meet requirements because the school has no official immunization certificate on record.

⁷ Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated

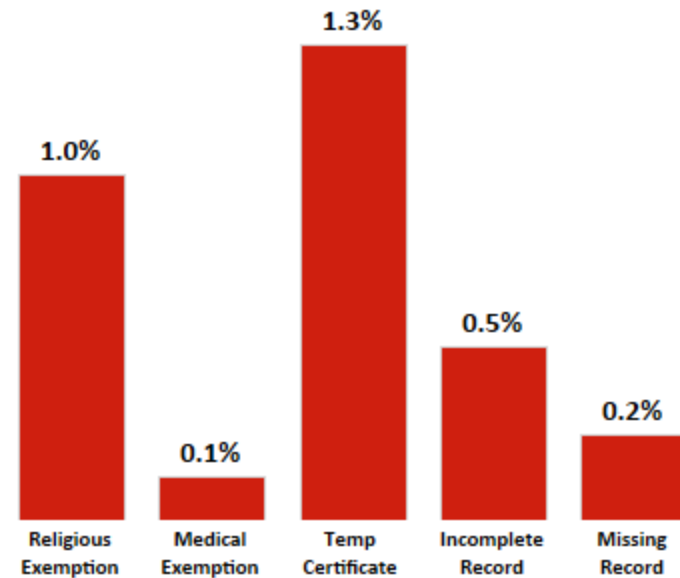

⁸ <https://www.tn.gov/health/cedep/immunization-program/ip/immunization-requirements/childcare-12th-grade-immunization-requirements.html>

ANDERSON COUNTY

Percentage of students in county complete by vaccine series vs. HP 2020 Goal of 95% complete and Statewide Average for each vaccine series

Percentage of students in county who were not fully immunized, by reason
