

CONCRETE II

COURSE DESCRIPTION

Concrete II is a course in which students will learn and practice intermediate skills related to reinforced concrete construction in residential and commercial structures. Topics covered include safe practices, advanced construction drawing interpretation and site layout, lightweight concrete, design of concrete mixes, design of reinforced concrete members. This course gives students a substantial skill and knowledge foundation typically required for apprentice concrete artisans.

It is strongly recommended that administration and guidance follow the scope and sequence and course recommendations as listed.

Recommended: Construction Core, Concrete I, Algebra I, Geometry, Principles of Technology I or Physical Science

Recommended Credits: 2

Recommended Grade Level(s): 11th 12th

Number of Competencies in Course: 47

CONCRETE II

STANDARDS

- 1.0** Students will demonstrate leadership, citizenship, and teamwork skills required for success in the school, community, and workplace.
- 2.0** Students will take personal responsibility for the safety of themselves, their coworkers, and bystanders.
- 3.0** Students will interpret, lay out, and fabricate in conformance to construction drawings and written specifications.
- 4.0** Students will investigate the types, properties, and uses of lightweight concrete.
- 5.0** Students will design and test concrete mixes to meet specifications.
- 6.0** Students will demonstrate construction site layout requiring radial measurements and curvilinear boundaries.
- 7.0** Students will design common reinforced concrete structural members.
- 8.0** Students will describe basic troubleshooting methodologies for identifying and remedying concrete defects.
- 9.0** Students will describe common surface defects and demonstrate ways to repair them.
- 10.0** Students will demonstrate communication skills required in the concrete industry.
- 11.0** Students will utilize concrete knowledge and skills to apply in a work-based or school project-based learning experience.

CONCRETE II

STANDARD 1.0

Students will demonstrate leadership, citizenship, and teamwork skills required for success in the school, community, and workplace.

LEARNING EXPECTATIONS

The student will:

- 1.1** Demonstrate leadership skills.
- 1.2** Use problem-solving techniques to address and propose solutions to school, community, and workplace problems.
- 1.3** Demonstrate the ability to work professionally with others.
- 1.4** Participate in SkillsUSA as an integral part of instruction.
- 1.5** Exhibit integrity and pride in artisanship.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 1.1A** Exhibits integrity and pride in artisanship.
- 1.1B** Keeps group work focused on task.
- 1.2A** Determines the root causes of observed conflicts or problems.
- 1.2B** Mediates disputes between parties.
- 1.3A** Participates in a job shadowing experience.
- 1.3B** Assembles a student team to solve an assigned problem.
- 1.4** Attends and participates in periodic meetings of SkillsUSA or similar organization.
- 1.5** Exhibits integrity and pride in artisanship.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Prepare a resume.
- Participate in various SkillsUSA or similar programs and/or competitive events.
- Attend a professional organization meeting such as, local Chamber of Commerce meeting.
- Participate in the American Spirit Award competition with SkillsUSA.
- Participate in job shadowing or internship program with local business or industry.
- Take an active role in a group project assigned by the instructor.
- Identify and detail a problem area in the school, community, or workplace, and propose solutions. If possible, and with appropriate approvals, implement or facilitate the solution.

INTEGRATION LINKAGES

SkillsUSA *Professional Development Program* (PDP), SkillsUSA, Communication and Writing Skills, Teambuilding Skills, Research, Language Arts, Sociology, Psychology, Algebra, Geometry, English, Social Studies, Problem Solving, Interpersonal Skills, Employability Skills, Critical-Thinking Skills, SCANS (Secretary's Commission on Achieving Necessary Skills), Chamber of Commerce, Colleges, Universities, Technology Centers, and Employment Agencies, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), United States Department of Labor, United States Department of Labor *Dictionary of Occupational Titles*, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 2.0

Students will take personal responsibility for the safety of themselves, their coworkers, and bystanders.

LEARNING EXPECTATIONS

The student will:

- 2.1 Exhibit and encourage in others a positive attitude regarding safety practices and issues.
- 2.2 Habitually inspect and use appropriate personal protective equipment for assigned tasks.
- 2.3 Inspect, maintain, and employ safe operating procedures with tools and equipment, such as lifting equipment and power finishing equipment.
- 2.4 Exhibit a well-developed awareness of potential hazards to themselves and others.
- 2.5 Carry out responsibilities under HazCom (Hazard Communication) regulations.
- 2.6 Take action to protect coworkers and bystanders from hazards as required by regulations, and Occupational Safety and Health Administration (OSHA) policies.
- 2.7 Report accidents and observed hazards and execute emergency response procedures as required by regulations and Occupational Safety and Health Administration (OSHA) policies.
- 2.8 Demonstrate appropriate construction-related safety procedures.
- 2.9 Pass with 100 % accuracy a written examination relating to concrete safety issues
- 2.10 Pass with 100% accuracy a performance examination relating to concrete tools and equipment safety.
- 2.11 Maintain a portfolio record of written safety examinations and equipment examinations for which the student has passed an operational checkout by the instructor.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 2.1A Includes safety procedures in activity plans.
- 2.1B Exhibits an awareness of proper safety procedures by coworkers.
- 2.1C Responds positively to instruction, advice, and correction regarding safety issues.
- 2.1D Reports to school or work physically ready to perform to professional standards, such as rested, or not impaired by medications, drugs, or alcohol.
- 2.2 Selects, inspects, and uses the correct personal protective equipment for the assigned task.
- 2.3A Checks welding torches for leaks, prior to use.
- 2.3B Inspects extension cords for the presence of a functional ground connection, prior to use.
- 2.4A Is observant of personnel and activities in the vicinity of their work area.
- 2.4B Warns nearby personnel, prior to starting potentially hazardous actions.
- 2.5A Applies information from material safety data sheets (MSDS) to protect self and others from the health hazards associated with assigned tasks.
- 2.5B Reports hazards found on the job site to the supervisor and remedies the hazard as instructed.

- 2.6** Provides and activates adequate ventilation equipment as required by the task.
- 2.7A** Reports all injuries and observed unguarded hazards to the immediate supervisor.
- 2.7B** Executes assigned tasks as described in emergency response procedures.
- 2.8A** Is observant of safety issues and concerns relevant to the construction industry.
- 2.8B** Complies with all safety guidelines and regulations set forth by industry and OSHA.
- 2.9** Passes with 100 % accuracy a written examination relating to concrete safety issues.
- 2.10** Passes with 100% accuracy a performance examination relating to concrete tools and equipment safety.
- 2.11** Maintains a portfolio record of written safety examinations and equipment examinations for which the student has passed an operational checkout by the instructor.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Prior to assigning a task using power tools, the instructor removes some required safety items and instructs students to perform an inspection of tools.
- Instruct a visitor to obviously approach the vicinity of a student conducting a hazardous activity and note the level of awareness demonstrated by the student.
- In a project requiring solvents or adhesives, introduce a new brand or type and require students to retrieve the MSDS and identify possible health hazards.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Power Tool Institute (PTI), Environmental Protection Agency (EPA), United States Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 3.0

Students will interpret, lay out, and fabricate in conformance to construction drawings and written specifications.

LEARNING EXPECTATIONS

The student will:

- 3.1** Scale dimensions that are not explicitly included in construction drawings.
- 3.2** Interpret plan and elevation views shown in construction drawings.
- 3.3** Recognize and correctly interpret lines and symbols commonly used in construction drawings.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 3.1A** Uses the scale of a drawing to determine locations not explicitly dimensioned.
- 3.1B** Uses the scale of a drawing to determine dimensions not explicitly shown on drawing.
- 3.2** Interprets three-dimensional features found in construction drawings.
- 3.3A** Readily relates structural concrete components and joints with symbols and concrete details in construction drawings.
- 3.3B** Interprets object lines, dimension and extension lines, center lines, section lines, and other lines commonly found in construction drawings.
- 3.3C** Readily relates symbols and details of framing, electrical, and plumbing elements that effect or could be affected by concrete decisions.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Given a set of plans and specifications for a residential or commercial structure, make a complete material take-off for the concrete components.
- Given a set of plans and specifications for a residential or commercial structure, determine the location of concrete elements not explicitly dimensioned.
- Determine the detail of specified routing and structural supports for conduit or piping runs through masonry structures shown in construction drawings.
- Given a set of plans and specifications for a residential or commercial structure, determine the location of elements not explicitly dimensioned.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Power Tool Institute (PTI), Environmental Protection Agency (EPA), United States Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 4.0

Students will investigate the types, properties, and uses of lightweight concrete.

LEARNING EXPECTATIONS

The student will:

- 4.1 Research lightweight aggregates for concrete.
- 4.2 Compare and contrast lightweight aggregates, designs, and processes for roof and floor decks and walkways.
- 4.3 Design and construct test panels using lightweight concrete as one component of a composite.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 4.1A Compares cost and performance of available natural and manufactured lightweight aggregates.
- 4.1B Researches and reports on the lightweight concrete systems favored by local architects and builders.
- 4.2A Compares and contrasts the insulation values for different lightweight concrete mixtures.
- 4.2B Compares and contrasts methods of providing structural strength in lightweight concrete decks.
- 4.2C Compares and contrasts the cost and availability of various lightweight concrete aggregates.
- 4.3A Designs and constructs composite lightweight concrete roof or floor panels that take advantage of the compressive strength of the concrete.
- 4.3B Designs and constructs composite lightweight concrete systems that are optimized for insulation and installed cost.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Construct demonstration panels for a composite lightweight concrete application as shown in construction drawings of a commercial building.
- Take a field trip to observe the construction of lightweight concrete decks.
- Survey current and planned local commercial construction projects to determine what uses are being made of lightweight concrete.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), United States Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 5.0

Students will design and test concrete mixes to meet specifications.

LEARNING EXPECTATIONS

The student will:

- 5.1** Design concrete mixes to meet specifications.
- 5.2** Select aggregate from available sources and adapt concrete mixes to meet specifications.
- 5.3** Calculate weights of components required to produce test samples of given concrete mix design.
- 5.4** Cast, cure, and test concrete samples and compare with performance specifications.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 5.1A** Determines water to cement ratios to produce desired compressive strength.
- 5.1B** Determines aggregate proportions to meet specifications.
- 5.2A** Determines sizes, densities, and costs of available aggregates.
- 5.2B** Determines optimum ratios of different size aggregates to minimize cement gel requirements.
- 5.3A** Determines the density of all components in a concrete mix.
- 5.3B** Calculates the amount of each component by weight to prepare a test mix of designed concrete.
- 5.4A** Mixes a test batch of designed concrete.
- 5.4B** Casts test samples according to code requirements.
- 5.4C** Cures test samples according to code requirements.
- 5.4D** Tests compression strength of samples according to code requirements.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Design a cost-effective 4700-psi concrete for use in your local area.
- Design and test a cost-effective 6000-psi pumpable concrete for use in your area in the winter.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 6.0

Students will demonstrate construction site layout requiring radial measurements and curvilinear boundaries.

LEARNING EXPECTATIONS

The student will:

- 6.1** Locate points on a construction site layout using angular measurements and control points.
- 6.2** Verify locations by comparing multiple measurements.
- 6.3** Lay out structural, landscape, and architectural components with curvilinear boundaries.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 6.1A** Converts two-dimensional coordinates between rectangular and polar coordinates.
- 6.1B** Locates points on a building site with measurements of one angle and one linear measurement.
- 6.1C** Locates points on a building site with two angular measurements from control points.
- 6.2A** Correctly uses multiple linear measurements to establish and verify points on a site layout.
- 6.2B** Correctly uses multiple combinations of linear and angular measurement to establish and verify points on a site layout.
- 6.3A** Correctly lays out points on a curved boundary and interpolate between points.
- 6.3B** Correctly lays out circular segments.
- 6.3C** Correctly lays out boundaries defined by a sequence of straight lines.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Lay out locations and elevations for a multilevel octagonal fountain.
- Lay out a curved access road to be added to school property.
- Lay out the forms for a curved curb to border a garden according to specifications.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 7.0

Students will design common reinforced concrete structural members.

LEARNING EXPECTATIONS

The student will:

- 7.1 Design reinforced concrete beams.
- 7.2 Design one-way reinforced concrete slabs.
- 7.3 Design reinforced concrete columns with small eccentricity.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 7.1A Correctly designs single and multiple span rectangular beams with uniform loading.
- 7.1B Correctly designs single and multiple span rectangular beams with specified non-uniform loading.
- 7.1C Correctly designs simple T-beams.
- 7.2A Correctly designs single and multiple span one-way slabs.
- 7.2B Correctly designs on-grade slabs for local residential construction.
- 7.3A Correctly designs short axially loaded columns.
- 7.3B Correctly designs columns with both axial and lateral loads.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Propose a complete design for a single span bridge beam, including such things as dimensions, concrete mix, reinforcement size and placement, shear reinforcement, etc.
- Propose a complete design for a cantilevered apartment patio slab.
- Design a beam and slab foundation for a single family home in the local area.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 8.0

Students will describe basic troubleshooting methodologies for identifying and remedying concrete defects.

LEARNING EXPECTATIONS

The student will:

- 8.1** Describe and demonstrate a reasoned troubleshooting process.
- 8.2** Make a checklist of observable problems with reinforcement and forms prior to placement of concrete.
- 8.3** Identify and describe tests and remedies for problems with wet concrete mixes at the job site.
- 8.4** Describe possible difficulties and remedies associated with concrete placement and defects that could result.
- 8.5** Describe observable defects in concrete caused by poor curing practices and possible remedies.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 8.1A** Writes an expository paper about the general process of troubleshooting. Provide a reasoned sequence and rank the relative importance of problem identification, research, documentation, causality, remediation, and failure attribution.
- 8.1B** Develops checklists of formal inspections and tests typical of concrete construction, such as inspections of embedded plumbing and electrical components, slump tests, and concrete sample preparation.
- 8.2A** Prepares a list of observable defects in concrete form installation.
- 8.2B** Prepares a list of observable defects in the installation of concrete reinforcement.
- 8.3A** Describes and demonstrates formal and informal tests applicable to job site inspection of concrete mixes.
- 8.3B** Describes remedies and action to be taken in the event of failure of a slump test.
- 8.3C** Describes possible problems and remedies if concrete with an out-of-specification aggregate is delivered to the job site.
- 8.4A** Describes possible defects and remedies caused by too little or too much action to consolidate concrete.
- 8.4B** Describes what job site remedies are possible if consolidation difficulties are encountered.
- 8.5A** Describes observable surface defects caused by improper curing practice.
- 8.5B** Describes remedial modifications to a curing plan to accommodate extreme weather conditions.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Make repeated field trips to a large-scale local construction project to observe concrete construction in progressive stages.

- Invite a guest speaker (e.g., job site foreman) to recount problems and remedies encountered during concrete construction.
- Resolve various problem scenarios with group members role-playing as inspectors, job superintendent, contractor's representative, and project engineer as appropriate.

INTEGRATION LINKAGES

SkillsUSA *Professional Development Program* (PDP), SkillsUSA, Communication and Writing Skills, Teambuilding Skills, Research, Language Arts, Sociology, Psychology, Algebra, Geometry, English, Social Studies, Problem Solving, Interpersonal Skills, Employability Skills, Critical-Thinking Skills, SCANS (Secretary's Commission on Achieving Necessary Skills), Chamber of Commerce, Colleges, Universities, Technology Centers, and Employment Agencies, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), United States Department of Labor, United States Department of Labor *Dictionary of Occupational Titles*, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 9.0

Students will describe common surface defects and demonstrate ways to repair them.

LEARNING EXPECTATIONS

The student will:

- 9.1** Identify common concrete defects found in existing structures.
- 9.2** Describe and demonstrate appropriate methods for repairing defects in concrete structures.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 9.1A** Recognizes and identifies defects in concrete.
- 9.1B** Identifies the causes of concrete deterioration.
- 9.2A** Selects appropriate repair technique.
- 9.2B** Prepares the surface and makes the repair.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Inspect existing concrete work around your town for defects and identify root cause for any defects found.
- Describe the steps you would take to make the repairs in the above-noted defect.
- Inspect any concrete projects you constructed. Identify and repair, if possible, any defects found.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, Algebra, Geometry, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education Research (NCCER), Occupation Safety and Health Administration (OSHA), Department of Labor, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 10.0

Students will demonstrate communication skills required in the concrete industry.

LEARNING EXPECTATIONS

The student will:

- 10.1** Communicate and comprehend oral and written information pertaining to concrete and masonry.
- 10.2** Solve problems and make decisions using critical thinking process.
- 10.3** Use teamwork skills and a logical thinking process to solve problems relating to issues.
- 10.4** Will create pre-employment materials for prospective employer.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 10.1A** Interprets and uses written information in common job formats, such as tables, charts, and reference materials and manuals.
- 10.1B** Interprets and uses blueprints, piping schematics, and mechanical drawings to solve construction problems.
- 10.1C** Uses electronic resources to obtain information.
- 10.1D** Analyzes information obtained from various sources to determine a solution to a construction problem.
- 10.1E** Interprets a work order for concrete.
- 10.2A** Develops a hypothesis regarding the cause of a problem.
- 10.2B** Tests the hypothesis to determine the solution to the problem.
- 10.2C** Creates, evaluates, and revises a plan to resolve a problem.
- 10.2D** Implements strategy based diagnostic procedure by verifying the complaint, defining the problem, isolating the problem, validating the problem, making repairs, and testing the repairs in concrete.
- 10.3A** Serves in each of the functional roles of a team.
- 10.3B** Resolves conflicts within a group.
- 10.3C** Demonstrates appropriate and positive examples of giving and accepting criticism.
- 10.3D** Modifies behavior or revises work based on appropriate criticism.
- 10.3E** Solves problems in cooperation with other members of a group.
- 10.3F** Evaluates the role of the concrete worker within the organizational system of an independent shop or construction contractor.
- 10.4A** Determines materials and resources needed for employment interview.
- 10.4B** Develops resume, cover letter, and personal reference materials.
- 10.4C** Prepare for a positive job interview.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion.

- Use electronic media to obtain manufacturers diagnostic information for a given piece of equipment.
- Document a problem as explained by a customer or instructor.
- Explain a documented service problem to a fellow student or instructor.
- Document the diagnostic procedure used to solve a service problem.
- Explain the service procedure used to solve a service problem to a fellow student or instructor.
- Document a proposed solution or corrective action to a service problem.
- Explain a proposed solution or corrective action to a service problem.
- Develop and test a corrective procedure for a service problem and explain to instructor.
- Work as a team member to solve a service related issue.
- Serve as a team leader to solve a service related issue.
- Research the function of service technicians in relation to customer satisfaction, customer perception of the company and perception of company in the community.
- Write a resume with cover letter and reference page.
- Fill out an employment application.
- Participate in mock job interviewing exercises.

INTEGRATION LINKAGES

Science, Computer Skills, Research and Writing Skills, Language Arts, Communication Skills, Leadership Skills, Teamwork Skills, English, Secretary's Commission on Achieving Necessary Skills (SCANS), SkillsUSA, SkillsUSA *Professional Development Program* (PDP), SkillsUSA *Total Quality Curriculum*, Associated Builders and Contractors (ABC), Associated General Contractors (AGC), MAVCC, National Center for Construction Education and Research (NCCER), Occupational Safety and Health Administration (OSHA), Environmental Protection Agency, United States Department of Labor and Workforce Development, Tennessee Department of Labor and Workforce Development

CONCRETE II

STANDARD 11.0

Students will utilize concrete knowledge and skills to apply in a work-based or school project-based learning experience.

LEARNING EXPECTATIONS

The student will:

- 11.1** Apply principles of concrete construction to a work-based or school project-based learning situation.
- 11.2** Integrate time management principles in organizing personal schedule, including school, work, social, and other activities.
- 11.3** Evaluate and apply principles of ethics as they relate to the work-based or school project-based learning experience.
- 11.4** Employ principles of safety to the work-based or school project-based learning experience.

PERFORMANCE INDICATORS: EVIDENCE STANDARD IS MET

The student:

- 11.1** Scores 80% or above on performance evaluations based on job readiness and knowledge of concrete.
- 11.2** Designs a personal plan that includes a schedule of activities.
- 11.3** Records and assesses workplace events based on ethical implications.
- 11.4A** Scores 100% on safety performance and knowledge test covering concrete tools and equipment and Occupational Safety and Health Administration (OSHA), Tennessee Occupational Safety and Health Administration (TOSHA), and Environmental Protection Agency (EPA) rules and regulations.
- 11.4B** Applies safety rules and regulations to the work site.

SAMPLE PERFORMANCE TASKS

These are sample projects of the type and scale recommended to address one or more of the learning expectations for this standard. Other projects can be used at the instructor's discretion

- Compose and maintain a work journal that includes general work site experiences, time management planning, and evaluation of ethical behavior.
- Create a training manual for a new student outlining the safety considerations for the job.
- Keep a record of wages and hours-earned working on the job.
- Figure gross pay based on hours worked and rate paid per hour.
- Keep a record of personal work-related expenses and budget according.
