

Human Anatomy and Physiology : Embedded Inquiry

Conceptual Strand

Understandings about scientific inquiry and the ability to conduct inquiry are essential for living in the 21st century.

Guiding Question

What tools, skills, knowledge, and dispositions are needed to conduct scientific inquiry?

Course Level Expectations

CLE 3251.Inq.1 Recognize that science is a progressive endeavor that reevaluates and extends what is already accepted.

CLE 3251.Inq.2 Design and conduct scientific investigations to explore new phenomena, verify previous results, test how well a theory predicts, and compare opposing theories.

CLE 3251.Inq.3 Use appropriate tools and technology to collect precise and accurate data.

CLE 3251.Inq.4 Apply qualitative and quantitative measures to analyze data and draw conclusions that are free of bias.

CLE 3251.Inq.5 Compare experimental evidence and conclusions with those drawn by others about the same testable question.

CLE 3251.Inq.6 Communicate and defend scientific findings.

Checks for Understanding

✓**3251.Inq.1** Trace the historical development of a scientific principle or theory, such as the cell theory, evolution, or DNA structure.

✓**3251.Inq.2** Select a description or scenario that reevaluates and/or extends a scientific finding.

✓**3251.Inq.3** Conduct scientific investigations that include testable questions, verifiable hypotheses, and appropriate variables to explore new phenomena or verify the experimental results of others.

✓**3251.Inq.4** Select appropriate tools and technology to collect precise and accurate quantitative and qualitative data.

✓**3251.Inq.5** Evaluate the accuracy and precision of data.

✓**3251.Inq.6** Determine if data supports or contradicts a hypothesis or conclusion.

✓**3251.Inq.7** Compare or combine experimental evidence from two or

	<p>more investigations.</p> <p>✓3251.Inq.8 Recognize, analyze, and evaluate alternative explanations for the same set of observations.</p> <p>✓3251.Inq.9 Analyze experimental results and identify possible sources.</p> <p>✓3251.Inq.10 Compare conclusions that offer different, but acceptable explanations for the same set of experimental data.</p> <p>✓3251.Inq.11 Formulate and revise scientific explanations and models using logic and evidence.</p>
--	--

Human Anatomy and Physiology : Embedded Technology & Engineering

Conceptual Strand
Society benefits when engineers apply scientific discoveries to design materials and processes that develop into enabling technologies.

Guiding Question
How do science concepts, engineering skills, and applications of technology improve the quality of life?

Course Level Expectations	Checks for Understanding
<p>CLE 3251.T/E.1 Explore the impact of technology on social, political, and economic systems.</p> <p>CLE 3251.T/E.2 Differentiate among elements of the engineering design cycle: design constraints, model building, testing, evaluating, modifying, and retesting.</p>	<p>✓3251.T/E.1 Distinguish among tools and procedures best suited to conduct a specified scientific inquiry.</p> <p>✓3251.T/E.2 Apply the engineering design process to construct a prototype that meets developmentally appropriate specifications.</p>

<p>CLE 3251.T/E.3 Explain the relationship between the properties of a material and the use of the material in the application of a technology.</p> <p>CLE 3251.T/E.4 Describe the dynamic interplay among science, technology, and engineering within living, earth-space, and physical systems.</p>	<p>✓3251.T/E.3 Evaluate a protocol to determine the degree to which an engineering design process was successfully applied.</p> <p>✓3251.T/E.4 Explore how the unintended consequences of new technologies can impact human and non-human communities.</p> <p>✓3251.T/E.5 Evaluate the overall benefit to cost ratio of a new technology.</p> <p>✓3251.T/E.6 Present research on current bioengineering technologies that advance health and contribute to improvements in our daily lives.</p> <p>✓3251.T/E.7 Design a series of multi-view drawings that can be used by other students to construct an adaptive design and test its effectiveness.</p>

<h2>Human Anatomy and Physiology : Standard 1 - Anatomical Orientation</h2>	
<p>Conceptual Strand 1 <i>Anatomy and physiology investigates the interdependence of structure and function to form a living, integrated whole.</i></p>	
<p>Guiding Question 1 <i>How is the body organized to function effectively and maintain homeostasis?</i></p>	
<p>Course Level Expectations</p>	<p>Checks for Understanding</p>
<p>CLE 3251.1.1 Distinguish between anatomy and physiology.</p> <p>CLE 3251.1.2 Investigate the interrelationship between the structures</p>	<p>✓3251.1.1 Illustrate the interconnections between anatomy and physiology using a concept map.</p>

and functions of the body systems.

CLE 3251.1.3 Investigate the body cavities, the subdivisions of each cavity, and the organs within each area.

CLE 3251.1.4 Use correct anatomical terminology when discussing body structures, sections, and regions.

CLE 3251.1.5 Describe the body mechanisms that maintain homeostasis.

✓**3251.1.2** Sequence the levels of structural organization from the molecular level through the organismic level.

✓**3251.1.3** Use prepared slides to distinguish among different types of tissues.

✓**3251.1.4** Classify organ systems of the body as either (1) protection, support, and movement, (2) regulation and integration (3) transport, and (4) absorption and excretion.

✓**3251.1.5** Identify the major organs and describe the functions of each body system.

✓**3251.1.6** Identify and label the body cavities including the subdivisions and organs of each.

✓**3251.1.7** Apply correct terminology to reference anatomical orientation.

✓**3251.1.8** Provide examples of bodily mechanisms that serve to maintain homeostasis.

✓**3251.1.9** Explain how the body regulates temperature, blood carbon dioxide levels, and blood glucose levels.

Human Anatomy and Physiology : Standard 2 - Protection, Support, Movement

Conceptual Strand 2

The integumentary, skeletal, and muscular systems work together to support, protect, and move body structures as well as maintain homeostasis.

Guiding Question 2

How do body systems aid in support, protection, and movement as well as in maintaining homeostasis?

Course Level Expectations	Checks for Understanding
<p>CLE 3251.2.1 Identify structures of the integumentary, skeletal, and muscular systems and show the relationship between these structures and their functions.</p> <p>CLE 3251.2.2 Investigate physiological mechanisms that allow the integumentary, skeletal, and muscular systems to function.</p>	<p>✓3251.2.1 Identify the structures of the skin and explain their role in protecting the body and maintaining homeostasis.</p> <p>✓3251.2.2 Explain the physiological processes involved in healing the skin and disorders of the skin.</p> <p>✓3251.2.3 Construct a labeled model of the skin with descriptions of its functions.</p> <p>✓3251.2.4 Distinguish between the different types of bones.</p> <p>✓3251.2.5 Describe the physiological mechanisms involved in bone development, growth, and repair.</p> <p>✓3251.2.6 Identify the major muscles of the body.</p> <p>✓3251.2.7 Compare and contrast the axial and appendicular skeletons</p>

	<p>using a graphic organizer.</p> <p>✓3251.2.8 Observe, draw, and label the different types of muscle tissue noting their functions and structure.</p> <p>✓3251.2.9 Illustrate the major steps of the sliding filament theory of muscle contraction.</p>
--	--

Human Anatomy and Physiology : Standard 3 – Integration & Regulation

Conceptual Strand 3
The nervous and endocrine systems work in an integrative manner to maintain homeostasis and communicate with all other body systems.

Guiding Question 3
What external and internal bodily mechanisms are involved in communication, control, growth, and development?

Course Level Expectations	Checks for Understanding
<p>CLE 3251.3.1 Compare and contrast the anatomy and physiology of the central and peripheral nervous systems.</p>	<p>✓3251.3.1 Identify the major areas of the brain and the major structures of the spinal cord.</p>
<p>CLE 3251.3.2 Describe the structure, function, and developmental aspects of neurons and their supporting glial cells.</p>	<p>✓3251.3.2 Identify the structure and function of cranial nerves, neurons, neuroglia, and neuromuscular junctions.</p>
<p>CLE 3251.3.3 Investigate the physiology of electrochemical impulses and neural integration.</p>	<p>✓3251.3.3 Use a graphic organizer to trace the pathways and biochemical changes associated with conduction of an electrochemical impulse.</p>
<p>CLE 3251.3.4 Investigate organs for perception of external stimuli and to the maintenance of homeostasis.</p>	<p>✓3251.3.4 Construct a model to describe the molecular neurophysiology</p>

<p>CLE 3251.3.5 Identify the major organs of the endocrine system and the associated hormonal production and regulation.</p>	<p>of membrane potentials in terms of electrolyte function and active transport.</p> <p>✓3251.3.5 Identify the structures and functions of the body’s sensory organs.</p> <p>✓3251.3.6 Differentiate among the major organs and tissues that comprise the endocrine system.</p> <p>✓3251.3.7 Explain how the hormones secreted by endocrine glands regulate the body.</p> <p>✓3251.3.8 Interpret graphs of blood sugar levels in terms of pancreatic function.</p> <p>✓3251.3.9 Analyze a case study of a neurological disorder to make a speculative diagnosis or prognosis.</p>
---	--

Human Anatomy and Physiology : Standard 4 - Transport

Conceptual Strand 4
The cardiovascular system transports materials pumped by the heart through blood vessels to all parts of the body. The lymphatic system bathes the body in extracellular fluid and works with the cardiovascular system to provide immunity and regulate fat metabolism.

Guiding Question 4
How does the cardiovascular system transport substances that maintain homeostasis? What mechanisms are involved in staying healthy though the immune responses?

Course Level Expectations	Checks for Understanding
----------------------------------	---------------------------------

<p>CLE 3251.4.1 Identify the molecular and cellular components of the blood and the functions of the blood.</p> <p>CLE 3251.4.2 Explore the anatomy of the heart and describe the pathway of blood through this organ.</p> <p>CLE 3251.4.3 Describe the biochemical and physiological nature of heart function.</p> <p>CLE 3251.4.4 Describe the relationship between the structure and function of different types of blood vessels.</p> <p>CLE 3251.4.5 Describe the physiological basis of circulation and blood pressure.</p> <p>CLE 3251.4.6 Identify the structures of the lymphatic system.</p> <p>CLE 3251.4.7 Describe the details of the immune response.</p>	<p>✓3251.4.1 Describe the different types of blood vessels.</p> <p>✓3251.4.2 Identify the major arteries and veins.</p> <p>✓3251.4.3 Describe the cellular components and physical characteristics of blood.</p> <p>✓3251.4.4 Determine blood types in the ABO system.</p> <p>✓3251.4.5 Prepare a model that illustrates the layers, chambers, and valves of the heart.</p> <p>✓3251.4.6 Describe the biochemical and physiological events associated with heart contraction, blood pressure, and blood clotting.</p> <p>✓3251.4.7 Measure blood pressure and the pulse rates.</p> <p>✓3251.4.8 Draw a diagram that traces the pathway of blood through the heart and lungs.</p> <p>✓3251.4.9 Compare the molecular affinity of hemoglobin to oxygen and carbon monoxide in terms of maintaining homeostasis.</p> <p>✓3251.4.10 Describe the immune response mechanisms at the cellular level.</p> <p>✓3251.4.11 Relate nonspecific cellular and chemical defenses of the body to environmental factors.</p> <p>✓3251.4.12 Identify the causes of imbalances in the immune system.</p>
--	--

Human Anatomy and Physiology : Standard 5 – Absorption & Excretion

Conceptual Strand 5

The digestive system takes in food and changes it to a usable form. The urinary system removes wastes and maintains osmotic balance.

Guiding Question 5

How does the digestive system convert food into the raw materials that build and fuel the body's cells? How does the urinary system maintain the homeostatic balance of internal fluids?

Course Level Expectations	Checks for Understanding
<p>CLE 3251.5.1 Identify organs of the digestive and urinary systems and describe their functions.</p> <p>CLE 3251.5.2 Investigate mechanisms of digestion and food absorption.</p> <p>CLE 3251.5.3 Describe how nutrition, metabolism, and body temperature are related.</p> <p>CLE 3251.5.4 Explain how the kidneys function to remove wastes from the blood.</p>	<p>✓3251.5.1 Compare the structure and function of organs in the digestive system.</p> <p>✓3251.5.2 Contrast mechanical and chemical digestion</p> <p>✓3251.5.3 Trace a selected food through the alimentary canal.</p> <p>✓3251.5.4 Identify the enzymes and biochemical reactions that facilitate digestion.</p> <p>✓3251.5.5 Explain how the products of digestion are absorbed.</p> <p>✓3251.5.6 Compare and contrast the male and female urinary systems.</p> <p>✓3251.5.7 Explain how the kidneys act to maintain homeostasis.</p> <p>✓3251.5.8 Identify the parts of a nephron and describe how they assist in urine formation.</p>

	<p>✓3251.5.9 Describe the composition of urine.</p> <p>✓3251.5.10 Describe a countercurrent mechanism and explain how it concentrates urine.</p> <p>✓3251.5.11 Discuss the importance of water and electrolyte balance.</p> <p>✓3251.5.12 Describe how body temperature is regulated.</p>
--	---

Human Anatomy and Physiology : Standard 6 – Reproduction, Growth, and Development

Conceptual Strand 6

The reproductive system ensures the continuity of a species.

Guiding Question 6

How do the organs and structures of the reproductive system function to produce successive generations of offspring?

Course Level Expectations	Checks for Understanding
<p>CLE 3251.6.1 Identify the essential and accessory organs of the male and female reproductive systems and describe their functions.</p> <p>CLE 3251.6.2 Explain hormonal regulation during a typical 28 day menstrual cycle.</p> <p>CLE 3251.6.3 Summarize the principal events that occur during prenatal development.</p>	<p>✓3251.6.1 Relate the structures of the male and female reproductive systems to their functions.</p> <p>✓3251.6.2 Describe the role of hormones in controlling the secondary sex characteristics.</p> <p>✓3251.6.3 Compare and contrast the processes and products of oogenesis and spermatogenesis.</p>

	<p>✓3251.6.4 Trace the pathway that sperm travel from the testes to the exterior of the body.</p> <p>✓3251.6.5 Summarize the events of the menstrual cycle.</p> <p>✓3251.6.6 Describe the hormonal control mechanisms that regulate the menstrual cycle.</p> <p>✓3251.6.7 Sequence the stages of human development from fertilization to birth.</p> <p>✓3251.6.8 Describe the functions of the placenta.</p> <p>✓3251.6.9 Research and describe methods of controlling human fertility, and describe their relative effectiveness.</p>
