

MIST Operational Quick Tips Sheet for Students: AFIA

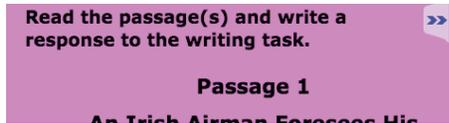

SETTINGS

Based on specific student needs, there are some additional settings available during testing.

Color Options:

Select the Settings icon, then choose a color option.

Text Reader Playback:

From Settings, move the slider to change the speed of audio playback. Move right to speed up or left to slow down.

MASKING

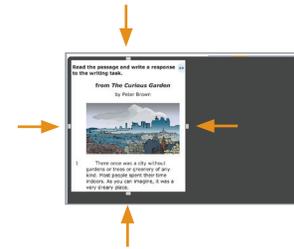

There are two kinds of masking features in MIST: Answer Masking and Custom Masking.

Answer Masking hides answers that you feel are incorrect. Select 'Hide' to mask answers, and "Show" to see them again.

Select Custom Masking and use the controls at the top, bottom, left, and right, to show or hide the desired parts of the screen.

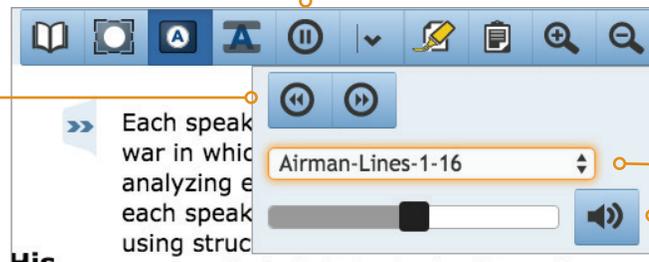

TEXT READER

The Text Reader automatically reads all of the test directions and items displayed on each screen, from top to bottom. As the text is being read, you can follow along as the words are highlighted in yellow.

Select **Play/Pause** to stop or start reading at any time.

Select the left arrow to read the previous track, or the right arrow to read the next track.

Select the drop-down arrow to choose the track you want to read.

Change the volume using the sliding track or mute the reading using the speaker icon.
