

Hello. My name is \_\_\_\_\_ and I work with the \_\_\_\_\_ health department. We are investigating a cluster of diarrheal illness that has recently come to our attention. We would like to ask people who have not been sick in the past two weeks or traveled out of Canada or the U.S. about some of the foods they have eaten recently. Answers from non-sick people will be compared to answers of sick people to see if we can find what is the cause of illness. Do you have a few minutes to answer some quick questions? It should take about 5-10 minutes at most. Everything you say will be kept strictly confidential. Your answers will be combined with answers others give and you will never be identified individually. You can choose to participate or not participate and you can stop the interview at any time.

May I proceed?
