## 2 | Cut It Out

Cut the 1/8 inch off the top and bottom, then the middle cut should be 4 inches in.

## 3 | Fold

The design is not a perfect triangle so base your folds on the logo to proportion white space.

## 4 | Staple

No instructions are really needed to staple; just curious to see on who reads all the instructions. Cheers to you!

base folds on text, **not evenly proportioned**
