Legislators Please RSVP via e-mail to jwellman@tngas.org by March 7.

ABOUT THE EXPO

America's interest in Natural Gas for transportation is at an all time high. On March 19, fleet managers from Waste Management, Frito Lay, Ryder Trucks and Westwood Farms along with natural gas utilities from across the state are sharing the positive impact of natural gas vehicles, fleets, and refueling stations. Due to the uncertainty and rising cost of gasoline, coupled with the concern for our environment and desire to improve economic development, now is the time for TGA members, local officials, and Tennessee legislators to unite and promote a domestic solution to this international issue affecting all Americans.

The NGV Expo is a one-day event for Tennessee legislators, natural gas system representatives, policy makers and others interested in a domestic solution for transportation to come together in Nashville to gain valuable information about NGVs. Arrive early to tour the natural gas vehicle parade lining the streets outside the perimeter of Legislative Plaza. View exhibits at Noon inside the War Memorial Auditorium. At 1:00 PM, the afternoon session kicks off with a welcome and opening remarks by local dignitaries.
