Education

Charter Schools Annual Report, SY2019-20

Tennessee Department of Education | Division of Choice | February 2024

Department of
Education

© Tennessee Department of Education

Introduction

Each year, the Tennessee Department of Education produces an annual report on charter schools operating in the State. In compliance with Tennessee Code Annotated, § 49-13-120, the report provides information on the charter school landscape in Tennessee, charter school numbers, academic performance, enrollment, and student characteristics. All data presented in this report is from the **2019-20 school year** unless otherwise noted. Additional information regarding charter schools is available on the [Tennessee Department of Education's website](#), including application materials, available grants, required reports, authorizer matters, and answers to frequently asked questions.

Tennessee Charter School Quick Facts for 2019-20

- A total of 117 charter schools were located within the geographic boundaries of four (4) school districts across the state: Hamilton County Schools, Knox County Schools, Memphis-Shelby County Schools, and Metro Nashville Public Schools.
- Six (6) entities functioned as local education agencies (LEAs) and authorized charter schools to operate: Hamilton County Schools, Knox County Schools, Metro Nashville Public Schools, and Memphis-Shelby County Schools, along with the Achievement School District (ASD) and the Tennessee State Board of Education (SBOE).
- Nine (9) new charter schools opened in the 2019-2020 school year, and six (6) charter schools were closed at the end of the school year.
- Tennessee charter schools enrolled 43,202 students which accounts for approximately 4.4% of the public-school student population statewide.
- Charter schools enrolled a significantly higher percentage of students from racial and ethnic minorities and those identified as economically disadvantaged compared to district-run schools.
- The graduation rate in charter schools was slightly higher (87%) as compared to district-run schools within LEAs that authorize charter schools (82%).

The Charter School Landscape in Tennessee

Legislative History

A charter school is a public school that is established and governed by a charter agreement between a charter school or charter management organization (CMO) and a local educational agency (LEA). Charter schools in Tennessee are established under the Tennessee Public Charter School Act of 2002 and the Tennessee High-Quality Charter Schools Act, as outlined in Chapter 13 of Title 49 of the Tennessee Code Annotated. A charter school, while part of its LEA, is governed by an independent governing board and has greater autonomy over its budget, personnel, curricula, and operations in exchange for heightened accountability. Tennessee law prohibits for-profit entities from operating or managing charter schools and requires all governing bodies to be not-for-profit organizations with a 501(c)(3) exemption.

The Tennessee Public Charter Schools Act of 2002 allows the creation of charter schools within the structure of a public school system and provides charter schools with flexibility to achieve goals outlined within their charter agreement. Charter schools are publicly funded, and as such, are subject to the same performance standards outlined by the Tennessee State Board of Education (SBE) for traditional public schools. A charter school authorizer may close a charter school if it fails to make sufficient progress toward performance expectations set forth in its charter agreement, materially violates its charter agreement, or fails to meet generally accepted standards of fiscal management. A charter school agreement may be revoked by the authorizer if the school is designated a Priority school under the State's accountability system.

If an authorizer decides not to revoke a charter school agreement once the school has been identified as a Priority school, then the school must develop and implement a comprehensive support and improvement plan. A charter school agreement must be revoked by the authorizer if the school is designated a Priority school for two consecutive accountability cycles. (More about Tennessee's accountability system is available [here](#).)

Enacted in 2017, the Tennessee High-Quality Charter Schools Act was aimed at increasing the number of high-performing charter schools in Tennessee. This Act required charter authorizers to adopt high-quality authorizing practices and established an authorizer fee to be paid by charter schools to the LEA for costs associated with charter authorization. It also clarified funding procedures for charter schools and established a grant that could be used by charter

schools to purchase school facilities or to pay for renovation and maintenance costs for existing facilities.

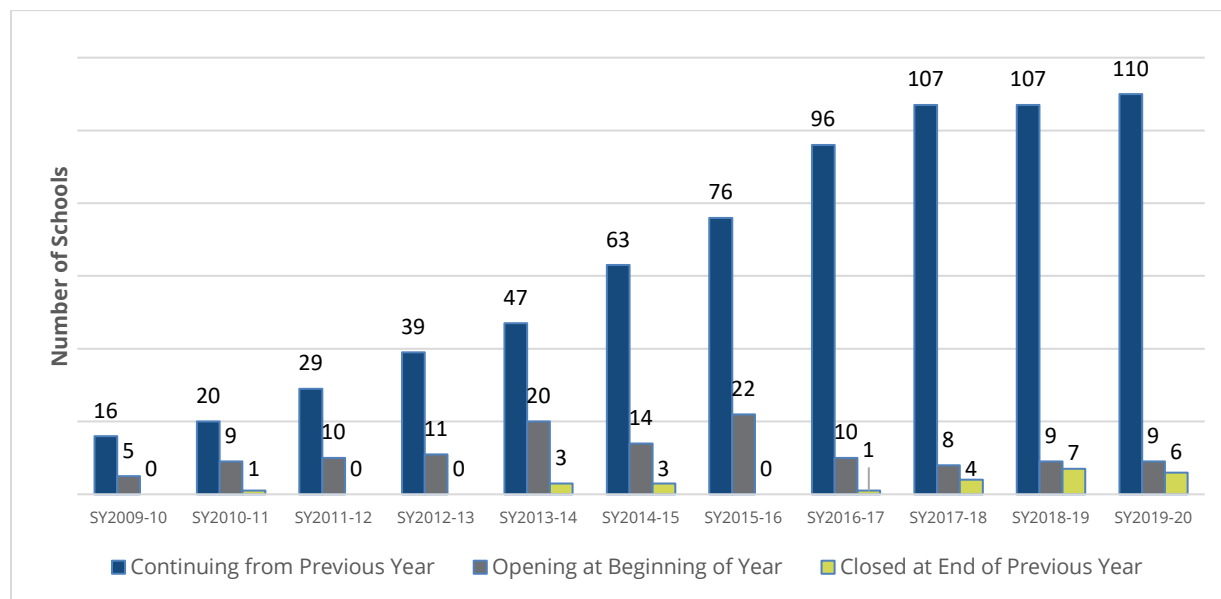

Charter Schools by the Numbers

In the 2019-20 academic year, charter schools in Tennessee were authorized by four local boards of education in addition to the Achievement School District and the Tennessee State Board of Education. The local school boards, comprising Hamilton County Schools, Knox County Schools, Metro Nashville Public Schools, and Memphis-Shelby County Schools, authorized around 77% of charter schools. Overall, 117 charter schools operated during this period, serving 43,202 students.

117 charter schools operated during the 2019-20 school year, serving 43,202 students.

Figure 1 depicts the change in total number of charter schools statewide since the first charter schools opened in 2003-04.

Figure 1. Openings and Closings of Charter Schools Over Time

As shown in Figure 1, the number of charter schools operating in Tennessee has steadily increased over the last decade. Although 26 charter schools have closed since 2010, the number of charter schools increased by 127 of which 117 remained open as of 2020. This continual growth underscores the state's commitment to expanding high-quality educational choices for Tennessee's students. Furthermore, this expansion reflects the evolving educational

landscape in Tennessee, where charter schools are increasingly recognized as vital instruments for meeting diverse student needs and driving innovation in teaching and learning.

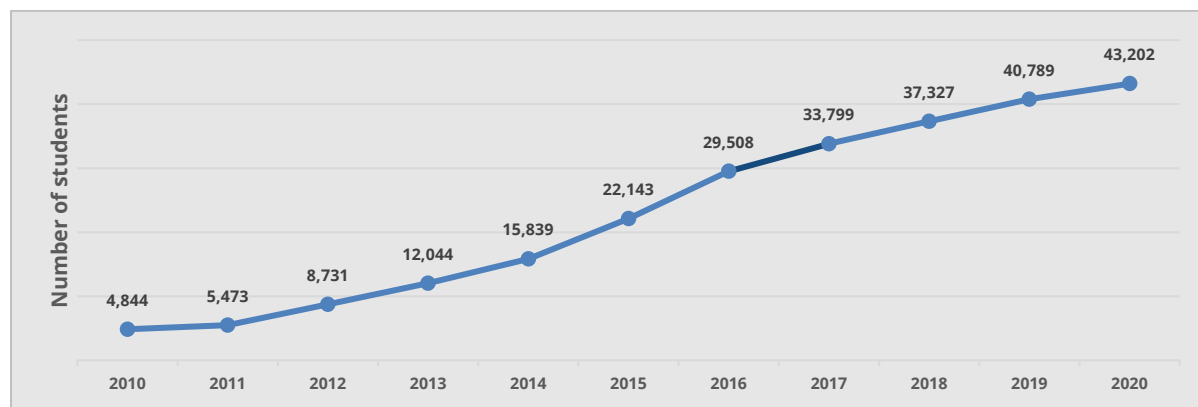

Student Enrollment

The number of students enrolled within a Tennessee charter school has increased by over 700%, from approximately 5,000 students in 2010 to 43,202 students in 2020. Charter school enrollment accounted for approximately 4.3% of the total public school student enrollment in Tennessee. This number is lower than the 7% US national average of students enrolled in public charter schools¹.

Between 2011 and 2020, charter school enrollment increased 760%

Charter school enrollment in Tennessee has increased in part due to strengthened legislation found within the High-Quality Charter School Act of 2017 and the increased fiscal support through Tennessee's [Charter Facilities Fund](#). This enrollment growth, with more than a 46% increase in charter school students between 2016 and 2020, reflects the positive impact of these supportive measures on the state's charter school landscape.

Figure 2. Growth in Charter School Enrollment Over Time

Student Mobility

Student mobility refers to the percentage of students changing schools during a school year, whether voluntary or involuntary. The student mobility rates included in Appendix E are shown as the percentage of students who transferred into or out of a charter school after October 1, 2019. Overall, charter school students have a slightly lower rate of mobility (11%) compared to students who attended district-run schools (17%). These numbers emphasize the stability and

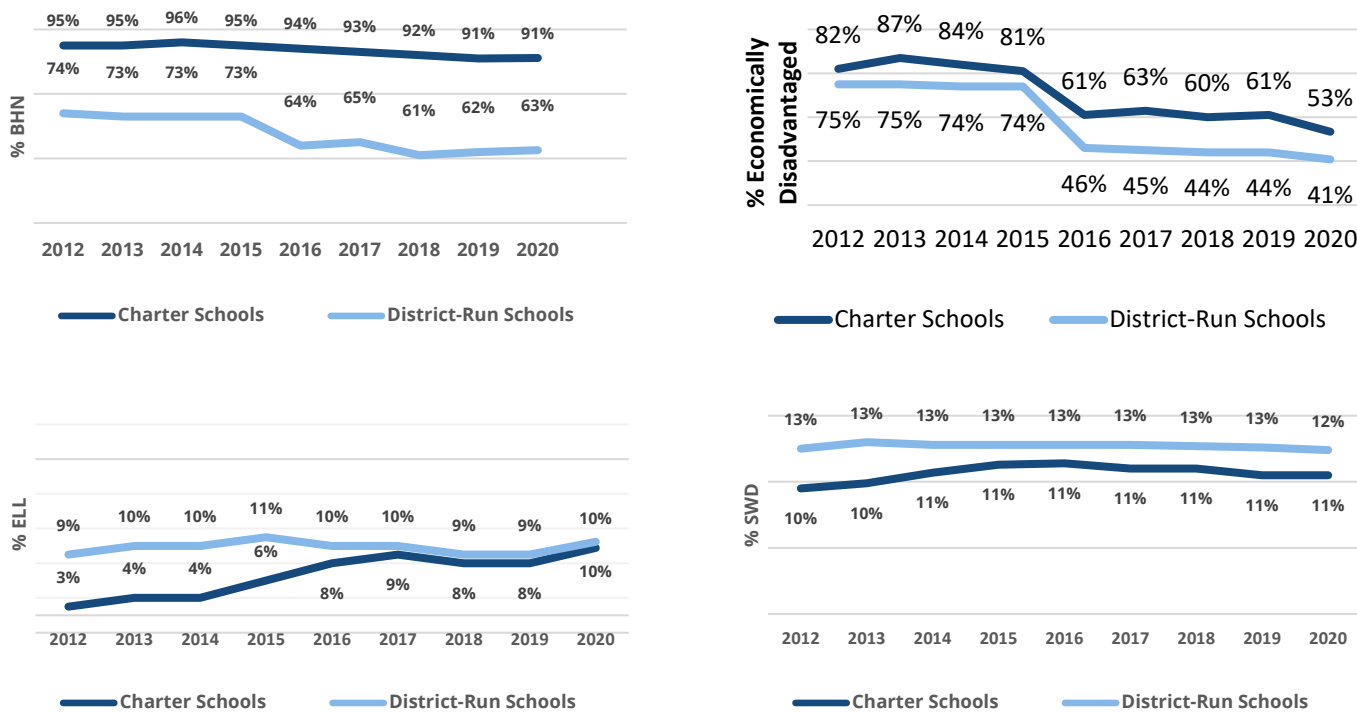

¹ <https://nces.ed.gov/fastfacts/display.asp?id=30>

consistency that charter schools can offer to students, especially in urban areas where mobility rates are generally higher. This lower mobility rate can be attributed to factors such as the unique curricular offerings, community engagement, and supportive environments found in many charter schools. Additionally, the continuity in education provided by charter schools can lead to better academic outcomes for students who might otherwise face disruptions in their learning due to frequent school changes.

Student Enrollment Characteristics

Charter schools enroll a significantly higher percentage of students from racial and ethnic minorities and those identified as economically disadvantaged compared to district-run schools. Approximately 53% of students who attend a charter school are economically disadvantaged, and over 90% come from major racial and ethnic groups. Figure 3 depicts the percentages of Black, Hispanic, and Native American (BHN) students, economically disadvantaged students, English language learners (ELL), and students with disabilities (SWD) enrolled in charter schools compared to non-charter schools (district-run schools) within the same LEAs.

Figure 3. Student Demographics Enrolled in Charter Schools Over Time²

² "BHN" means Black, Hispanic, and Native American.

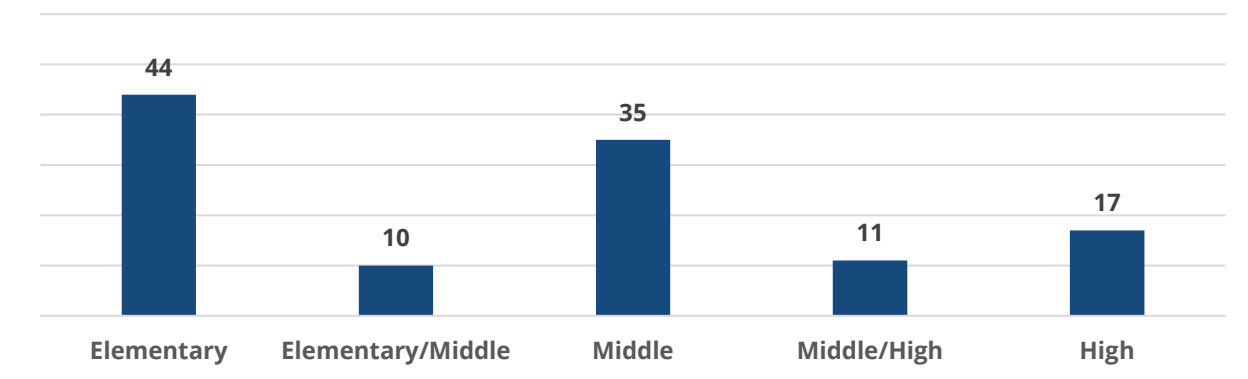

Charter schools have a 28-percentage point higher enrollment of minorities and a 12-percentage point higher enrollment of economically disadvantaged students than district-run schools. English learner (EL) students constituted about 10% of enrollment in both charter and district-run schools, and students with disabilities (SWD) made up 11% of charter school enrollment, slightly lower than the 12% in district-run schools.

Tennessee's charter schools have a greater percentage of minority and economically disadvantaged students compared to district-run schools.

School Size and Structure

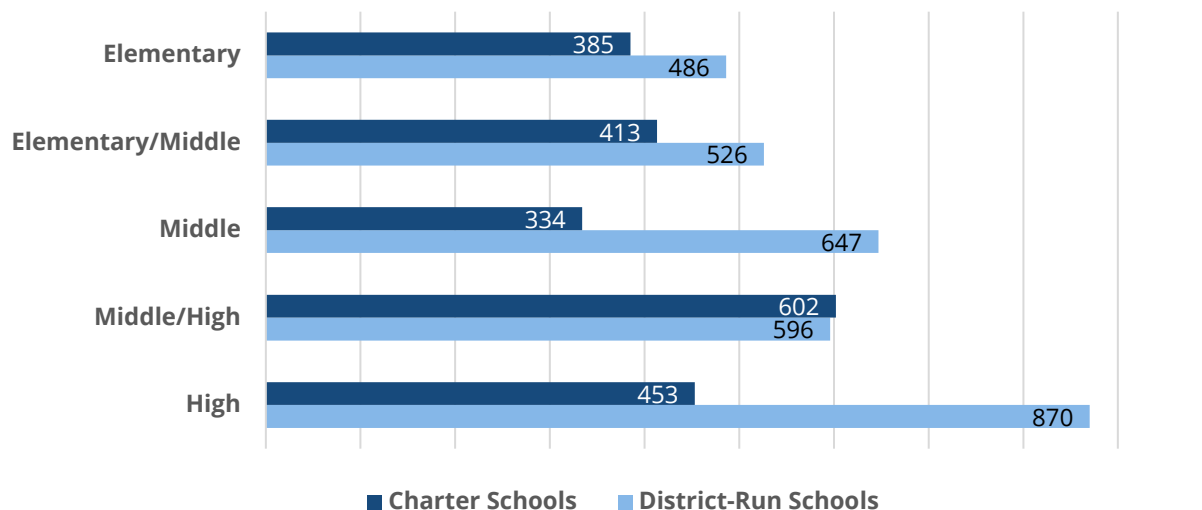

The Tennessee Public Charter School Act provides charter schools with the freedom to organize and structure themselves in the manner they determine to be most effective for educating students. Many use the same models as traditional district-run schools, organizing into elementary, middle, and high schools. In the 2019-20 school year, a majority (76%) of Tennessee's charter schools served only elementary to middle school grades, and approximately 24% served middle to high school grades.

Figure 4. Grade Configurations of Charter Schools, 2019-20

Generally, charter schools in Tennessee have a smaller average student enrollment per school than comparable district-run schools (Figure 5). Often new charter schools scale up over time, starting with only a single grade and taking multiple years to reach a planned grade configuration. Only charter schools that have reached their full grade span are included in the average total school enrollment metric found in Figure 5. Characteristics of individual charter schools are listed in Appendix A.

Figure 5. Average Enrollment at Charter Schools and District-Run Schools, 2019-20

State Accountability

Due to catastrophic tornados in middle Tennessee and school closures related to the COVID-19 pandemic, the Tennessee Legislature passed [Chapter 652](#) of the Public Acts of 2020. This piece of legislation suspended the requirement of state assessments for the 2019-2020 academic year. Lawmakers aimed to ensure that school districts, schools, teachers, and students were held harmless from state testing requirements and accountability measures during the unprecedented challenges of the COVID-19 pandemic. Furthermore, due to the suspension of state testing, Tennessee’s schools and districts did not generate state letter grades or school designation statuses during the 2019-20 school year³.

Although many school buildings remained closed and the requirement for LEAs to administer state assessments was suspended during the spring of 2020, educators in Tennessee still provided educational opportunities for students to learn. In June of 2020, the Tennessee State Board of Education (SBE) promulgated the Continuous Learning Plans (CLP) Emergency Rule 0520-01-17. Pursuant to this rule, LEAs established CLPs to outline how students will receive educational services during school closures due to emergency circumstances.

³ <https://www.tn.gov/content/dam/tn/education/health-&-safety/Accountability%20FAQ.pdf>

Graduation Rate

Legislation passed in 2020 ensured that no adverse action may be taken against any student, teacher, school, or LEA based on student assessment data. Furthermore, the legislation required the SBE to revise the high school graduation requirements for the 2019-20 school year to ensure that high school seniors who were affected by school closures during the spring of 2020 did not fail to receive a high school diploma for which the student was on-track to earn. In 2019-20, charter schools had a slightly higher graduation rate (87%) when compared to district-run schools within LEAs that authorized charter schools (82%).

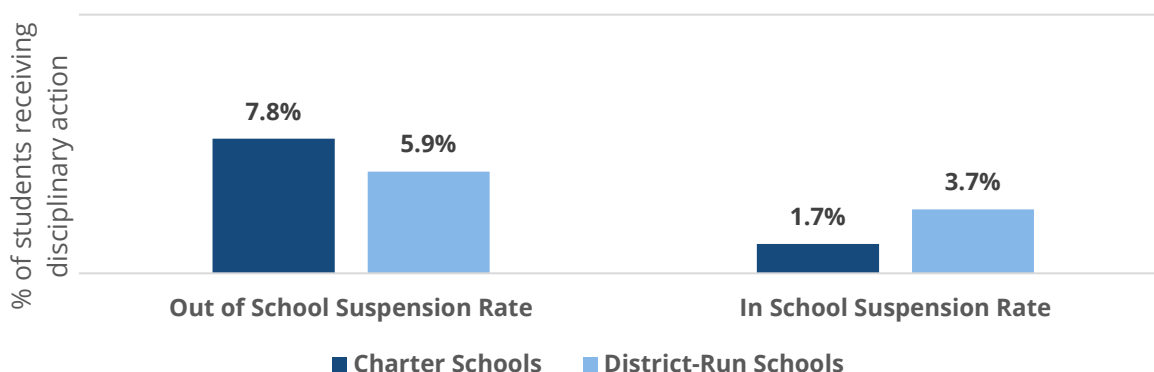

Table 1. Graduation Rates, 2019-20

School Type	Graduation Rate
Charter Schools	87%
District-Run Schools	82%

Discipline

Each year, public schools in Tennessee report disciplinary incidents experienced by students, including the reason for the incident and the type of disciplinary action taken. Discipline rates for in-school suspensions, out-of-school suspensions, and expulsions are calculated as the percentage of students within a student population who receive at least one of the specific types of discipline. During the 2019-20 academic year, charter schools had a slightly higher out-of-school suspension rate (7.8%) compared to district-run schools (5.9%) and a similar expulsion rate (<1%) relative to district-run schools (<1%). Additionally, charter schools had a slightly lower in-school suspension rate (1.7%) when compared with district-run schools (3.7%).

Figure 6. Discipline Rates, 2019-20

Conclusion

Charter schools continue to play a crucial role in Tennessee's public education system, providing families with valuable educational choices and contributing to the variety and quality of education options in the state. During the 2019-20 school year, charter schools showed adaptability and growth and continued to grow in number and student enrollment. Nine new schools opened during the 2019-20 school year which reflects Tennessee's dynamic response to evolving educational needs and standards. With a student enrollment of approximately 43,000 students, charter schools served approximately 4.4% of Tennessee's public-school students. Although heavily impacted by the COVID-19 pandemic during the 2019-20 school year, charter schools continued to provide various educational opportunities for enrolled students and achieved an 87% graduation rate which highlights the dedication of charter school educators to ensure student success, even throughout challenging circumstances.
