

Name: _____ Teacher: _____ School: _____

Grade 4: Lesson 20 Divide using an area model and partial quotients

1. Divide $224 \div 7$ using **both** the area model and the partial quotients method.

Area Model Method:

Partial Quotients Method:

$$7 \overline{) 224}$$

Divide using **either** the area model method or the partial quotients method.

2. $345 \div 3$

3. $209 \div 9$

4. John has 248 baseball cards. He wants to put 8 cards on each page in an album. How many pages will he fill?
