Item Information		
Item Code:	TN239421	Grade Level: Geometry
Standard Code:	G.CO.A.2	Position No: 1
Standard Text:	Represent transformations in the plane in multiple ways, including technology. Describe transformations as functions that take points in the plane (pre-image) as inputs and give other points (image) as outputs. Compare transformations that preserve distance and angle measure to those that do not (e.g., translation versus horizontal stretch).	
Reporting Category:	1: Congruence	
Calculator:	Z	
Correct Answer:	B	DOK Level: 2
		Item Type: O

## Metadata Definitions

<b>Item Code:</b> Unique letter/number code used to identify the item.	<b>Grade Level:</b> Grade level or Course.
<b>Standard Code:</b> Primary educational standard assessed.	<b>Position No:</b> Position of the item in the PDF.
<b>Standard Text:</b> Text of the educational standard assessed.	
<b>Reporting Category:</b> Text of the Reporting Category the standard assesses.	
<b>Calculator:</b> Indicates if usage of a calculator is allowed. Y = calculator is allowed, N = calculator is not allowed, Z = calculator may be allowed.	
<b>Correct Answer:</b> Correct answer. This may be blank for constructed response items where students write or type their responses.	<b>DOK Level:</b> (if listed): Depth of Knowledge (cognitive complexity) is measured on a three-point scale. 1= Recall or simple reproduction of information; 2= Skills and concepts: comprehension and processing of text; 3= Strategic thinking, prediction, elaboration.
	<b>Item Type:</b> Indicates administered usage. O = Operational.

Triangle  $ABC$  has vertices  $A(-3, 3)$ ,  $B(2, 4)$ , and  $C(-2, 2)$  and is translated according to the rule  $(x, y) \rightarrow (x + 2, y - 4)$ .

What are the coordinates of the vertices of the translated figure?

- A.**  $A'(-7, 5)$ ,  $B'(-2, 6)$ , and  $C'(-6, 4)$
- B.**  $A'(-1, -1)$ ,  $B'(4, 0)$ , and  $C'(0, -2)$
- C.**  $A'(-5, 7)$ ,  $B'(0, 8)$ , and  $C'(-4, 6)$
- D.**  $A'(-1, -1)$ ,  $B'(6, -2)$ , and  $C'(4, -6)$

**Item Information**

Grade Level: Geometry

Standard Code: G.CO.A.5

Position No: 2

Standard Text: Given a geometric figure and a rigid motion, draw the image of the figure in multiple ways, including technology. Specify a sequence of rigid motions that will carry a given figure onto another.

Reporting Category: 1: Congruence

Calculator: Z

Correct Answer: C

DOK Level: 2

Item Type: O

$\triangle ABC$  is rotated  $180^\circ$  counter clockwise about the origin to produce  $\triangle A'B'C'$ .

What are the coordinates of  $\triangle A'B'C'$ ?

- A.**  $A'(2, 1)$ ,  $B'(1, 1)$ , and  $C'(1, 3)$
- B.**  $A'(-2, 1)$ ,  $B'(-1, 1)$ , and  $C'(1, -3)$
- C.**  $A'(2, -1)$ ,  $B'(1, -1)$ , and  $C'(1, -3)$
- D.**  $A'(-1, -2)$ ,  $B'(-1, -1)$ , and  $C'(-3, -1)$

---

**Item Information**

Item Code: TN910140

Grade Level: Geometry

Standard Code: G.CO.B.6

Position No: 3

Standard Text: Use geometric descriptions of rigid motions to transform figures and to predict the effect of a given rigid motion on a given figure; given two figures, use the definition of congruence in terms of rigid motions to determine informally if they are congruent.

Reporting Category: 1: Congruence

Calculator: Z

Correct Answer: B,E

DOK Level: 2

Item Type: O

---

Consider the line segment defined by the points  $A(0, 1)$  and  $B(4, 6)$ . How does a reflection across the  $x$ -axis affect  $\overline{AB}$ ?

Select **all** that apply.

- A.** The  $x$ -values of the reflection are the opposite values of the  $x$ -values of the original segment.
- B.** The  $y$ -values of the endpoints become their opposites.
- C.** The length of the reflection of  $\overline{AB}$  is greater than the length of  $\overline{AB}$ .
- D.** The length of the reflection of  $\overline{AB}$  is less than the length of  $\overline{AB}$ .
- E.** The length of the reflection of  $\overline{AB}$  is the same as the length of  $\overline{AB}$ .

**Item Information**

Item Code: TN710390

Grade Level: Geometry

Standard Code: G.CO.B.7

Position No: 4

Standard Text: Use the definition of congruence in terms of rigid motions to show that two triangles are congruent if and only if corresponding pairs of sides and corresponding pairs of angles are congruent.

Reporting Category: 1: Congruence

Calculator: Z

Correct Answer: D

DOK Level: 2

Item Type: O

Which transformation proves  $\triangle ABC \cong \triangle DEF$ ?

- A.** reflection of  $\triangle ABC$  over the line  $y = x$
- B.** translation of  $\triangle ABC$  7 units right and 9 units down
- C.** rotation of  $\triangle ABC$   $90^\circ$  clockwise, centered at the origin
- D.** reflection of  $\triangle ABC$  over the  $y$ -axis and then over the  $x$ -axis

**Item Information**

Item Code: TN441970

Grade Level: Geometry

Standard Code: G.CO.C.11

Position No: 5

Standard Text: Prove theorems about parallelograms.

Reporting Category: 1: Congruence

Calculator: Z

Correct Answer: A,D,E

DOK Level: 2

Item Type: O

A partial proof that the opposite angles of a parallelogram are congruent is shown.

Given: Quadrilateral  $ABCD$  is a parallelogram

Prove:  $\angle A \cong \angle C$

Statements	Reasons
1. Quadrilateral $ABCD$ is a parallelogram	1. Given
2. $\overline{BC} \parallel \overline{AD}$ , $\overline{AB} \parallel \overline{DC}$	2.
3. $\angle A$ and $\angle B$ are supplementary; $\angle B$ and $\angle C$ are supplementary	3.
4. $\angle A$ and $\angle C$ are congruent	4.

*(This item continues on the next page.)*

*(Item 5, continued from the previous page)*

Which reasons are missing from the proof?

Select **all** that apply.

- A.** Definition of parallelogram
- B.** Definition of parallel lines
- C.** When parallel lines are cut by a transversal, corresponding angles are congruent.
- D.** When parallel lines are cut by a transversal, consecutive interior angles are supplementary.
- E.** Angles supplementary to the same angle are congruent to each other.
- F.** Angles supplementary to the same angle are supplementary to each other.

**Item Information**

Item Code: TN841784

Grade Level: Geometry

Standard Code: G.CO.C.9

Position No: 6

Standard Text: Prove theorems about lines and angles.

Reporting Category: 1: Congruence

Calculator: Z

Correct Answer: C

DOK Level: 2

Item Type: O

The steps of a proof are shown.

Given:  $a \parallel b$ ,  $\angle 1 \cong \angle 4$   
 Prove:  $\angle 2 \cong \angle 3$

Steps
1. $a \parallel b$ , $\angle 1 \cong \angle 4$
2. $\angle 1 \cong \angle 2$
3. $\angle 2 \cong \angle 4$
4. $\angle 4 \cong \angle 3$
5. $\angle 2 \cong \angle 3$

What is the reason for Step 4?

- A. Given
- B. Alternate Interior Angle Theorem
- C. Alternate Exterior Angle Theorem
- D. Transitive Property of Congruence

Grade Level: Geometry

Standard Code: G.C.A.2

Position No: 8

Standard Text: Identify and describe relationships among inscribed angles, radii, and chords.

Reporting Category: 2: Triangles and Circles

Calculator: Z

Correct Answer: A

DOK Level: 1

Item Type: O

---

Which statement about angles of a circle is true?

- A.** An angle inscribed in a semicircle is a right angle.
- B.** A central angle has one half the measure of the arc it subtends.
- C.** An inscribed angle has the same measure as the arc it subtends.
- D.** An inscribed angle in which one of the sides is a diameter is obtuse.

**Item Information**

Item Code: TN845778

Grade Level: Geometry

Standard Code: G.GPE.A.1

Position No: 9

Standard Text: Know and write the equation of a circle of given center and radius using the Pythagorean Theorem.

Reporting Category: 2: Triangles and Circles

Calculator: Z

Correct Answer: D

DOK Level: 2

Item Type: O

---

Jamal is asked to draw a circle. He is given the center and two points on the circle, but he isn't told which point is which. The points are  $(-4, 7)$ ,  $(3, 6)$ , and  $(-1, 3)$ . Jamal draws the accurate circle from this information.

What is the equation of the circle he draws?

- A.**  $(x + 4)^2 + (y - 7)^2 = 50$
- B.**  $(x - 3)^2 + (y - 6)^2 = 50$
- C.**  $(x - 3)^2 + (y - 6)^2 = 25$
- D.**  $(x + 1)^2 + (y - 3)^2 = 25$

Correct Answer: A

DOK Level: 2

Item Type: O

---

On a coordinate plane, the segment with endpoints  $(10, 40)$  and  $(70, 120)$  is dilated by a factor of  $\frac{4}{5}$ , with the origin as the center of dilation. What is the length of the resulting segment?

- A.** 80
- B.** 100
- C.** 112
- D.** 125

**Item Information**

Item Code: TN341656

Grade Level: Geometry

Standard Code: G.SRT.A.2

Position No: 12

Standard Text: Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.

Reporting Category: 2: Triangles and Circles

Calculator: Z

Correct Answer: B

DOK Level: 2

Item Type: O

What sequence of transformations can be used to prove that  $\triangle ABC \sim \triangle DEF$ ?

*(This item continues on the next page.)*

*(Item 12, continued from the previous page)*

- A.** Dilate  $\triangle ABC$  with respect to the origin using a scale factor of  $\frac{1}{3}$ . Then reflect the result over the  $y$ -axis.
- B.** Dilate  $\triangle ABC$  with respect to the origin using a scale factor of  $\frac{1}{2}$ . Then reflect the result over the  $y$ -axis.
- C.** Dilate  $\triangle ABC$  with respect to the origin using a scale factor of  $\frac{1}{3}$ . Then reflect the result over the  $x$ -axis.
- D.** Dilate  $\triangle ABC$  with respect to the origin using a scale factor of  $\frac{1}{2}$ . Then reflect the result over the  $x$ -axis.

---

	Item Type: O

In the diagram shown,  $\overline{AB} \parallel \overline{DE}$  and  $C$  is on both  $\overline{AE}$  and  $BD$ .

Which of these statements must be true?

Select **all** that apply.

- A.**  $\angle A \cong \angle D$  and  $\angle B \cong \angle E$
- B.**  $\triangle ABC \sim \triangle EDC$
- C.** Dilation by a factor of  $\frac{EC}{AC}$  centered at point  $C$  followed by a rotation of  $180^\circ$  about point  $C$ , maps  $\triangle ABC$  to  $\triangle EDC$ .
- D.** Rotation  $180^\circ$  about point  $C$  followed by a dilation by a factor of  $\frac{EC}{AC}$  centered at point  $C$ , maps  $\triangle ABC$  to  $\triangle EDC$ .
- E.** Dilation by a factor of  $\frac{EC}{AC}$  centered at point  $C$  followed by a reflection across the line through  $C$  parallel to  $\overline{AB}$ , maps  $\triangle ABC$  to  $\triangle EDC$ .

**Item Information**

Item Code: TN344316

Grade Level: Geometry

Standard Code: G.SRT.B.4

Position No: 15

Standard Text: Prove theorems about similar triangles.

Reporting Category: 2: Triangles and Circles

Calculator: Z

Correct Answer: B

DOK Level: 2

Item Type: O

$\triangle ABC$  and  $\triangle XYZ$  are both right triangles.

Statements	Reasons
1. $AC = 10, BC = 15,$ $XZ = 4, YZ = 6$	1. Given
2. ?	2. ?
3. $\angle ACB$ and $\angle XZY$ are right angles	3. Given
4. $\angle ACB \cong \angle XZY$	4. All right angles are congruent.
5. $\triangle ABC \sim \triangle XYZ$	5. SAS

**(Item 15, continued from the previous page)**

Which statement and reason are missing from the proof to prove  $\triangle ABC \sim \triangle XYZ$ ?

- A.**  $AC = XZ$  and  $BC = YZ$  since the lengths of the corresponding sides are equal.
- B.**  $\frac{AC}{XZ} = \frac{BC}{YZ}$  since the lengths of the corresponding sides are proportional.
- C.**  $AB = XY$  since the lengths of the hypotenuses are equal.
- D.**  $\frac{AC}{XZ} = \frac{YZ}{BC}$  since the lengths of the corresponding sides are proportional.

**Item Information**

Item Code: TN444396

Grade Level: Geometry

Position No: 16

Standard Text: Prove theorems about similar triangles.

Reporting Category: 2: Triangles and Circles

Calculator: Z

Correct Answer: D

DOK Level: 3

Item Type: O

The following statements describe triangles  $ABC$  and  $PQR$ .

For  $\triangle ABC$  :  $AC = 2$ ,  $AB = 4$ , and  $BC = 5$ .

For  $\triangle PQR$  :  $QR = 7.5$ ,  $PR = 3$ , and  $PQ = 6$ .

Which statement explains why  $\triangle ABC$  and  $\triangle PQR$  are either similar or not similar?

- A.**  $\triangle ABC$  and  $\triangle PQR$  are not similar because  $\frac{AC}{QR} \neq \frac{AB}{PR}$ .
- B.**  $\triangle ABC$  and  $\triangle PQR$  are similar because  $\frac{AC}{PR} = \frac{PQ}{AB} = \frac{BC}{QR}$ .
- C.**  $\triangle ABC$  and  $\triangle PQR$  are similar because  $\frac{AB}{PQ} = \frac{BC}{QR}$ .
- D.**  $\triangle ABC$  and  $\triangle PQR$  are similar because  $\frac{AC}{PR} = \frac{BC}{QR} = \frac{AB}{PQ}$ .

Reporting Category: 4: Two and Three Dimensional Geometry

Calculator: Z

Correct Answer: D

DOK Level: 2

Item Type: O

A right triangular prism and a rectangular prism are shown. Each prism has a height of  $h$  inches and a cross-section that is parallel to its base. The length and width of the rectangular cross-section given.

If the volumes of the two solids are equal, which pair of measurements are possible lengths of the legs of the right-triangular cross-section?

- A.** 4 in. and 6 in.
- B.** 6 in. and 8 in.
- C.** 8 in. and 12 in.
- D.** 12 in. and 16 in.

# Geometry to Integrated Math Courses Standard Crosswalk

The Tennessee Academic Standards for Mathematics are grouped by conceptual category — not by course — to allow for two approaches. The traditional approach consists of three courses: Algebra I, Geometry, and Algebra II. The integrated approach also consists of three courses: Integrated Math I, Integrated Math II, and Integrated Math III. Both pathways include the same content standards. Across the three courses, students in the traditional pathway will study the same content as students in the integrated pathway. The two pathways will provide the same entry point and the same exit point in the content standards. Because of limitations in the item bank for integrated pathway courses, only operational items from the traditional pathway assessments can be publicly released at this time. In order to provide assessment resources applicable to both pathways, the released items from traditional pathway assessments have been linked to standards in the integrated pathways. The table below lists the released items from the designated traditional pathway course, the standards they assess in that course, and the corresponding standards in the integrated pathway courses.
