

## PUBLIC NOTICE

**Zanini Tennessee, Inc.** has applied to the Tennessee Air Pollution Control Division (TAPCD) for a federally enforceable state operating permit to opt out of being subject to the provisions of paragraph 1200-03-09-.02(11) of the Tennessee Air Pollution Control Regulations (also frequently referred to as Title V regulations). Zanini Tennessee, Inc. has agreed to be bound by a permit that limits their potential to emit volatile organic compounds (VOC), a single hazardous air pollutant (HAP), and a combination of HAP such that they are below the applicability thresholds for VOC of 100 tons per year, a single HAP of 10 tons per year, and a combination of HAP of 25 tons per year. Zanini Tennessee, Inc. has agreed to use emission controls and record keeping methods to prove that they are abiding by more restrictive emission limits.

The applicant is Zanini Tennessee, Inc., with a site address of 840 Industrial Drive, Winchester, TN 37398. They seek to obtain a conditional major operating permit for their molded plastic wheel cover manufacturing facility which consists of various surface coating operations with VOC and particulate matter controls. It should be noted that the company has a current Title V operating permit for this facility.

-The TAPCD has made the determination that this facility can be approved to opt out of being subject to Title V regulations if certain conditions are met. A copy of the materials used by the TAPCD in making this determination and a copy of the draft permit are available electronically by accessing the Air Pollution Control Permits & Inspections Data Viewer located at:
