

You are Cordially Invited to
an Afternoon Briefing with the
Tennessee STEM Education Caucus

STEM Education for an Innovative Workforce

Presented by
The American Chemical Society Tennessee Government Affairs Committee,
The Tennessee STEM Innovation Network, and
The Tennessee STEM Education Caucus

Tuesday, February 24 at 3:00pm - 4:30pm Central
Old Supreme Court Room, Tennessee State Capitol Building
Nashville, Tennessee

Tennessee is at the forefront of manufacturing and innovation and is competing to attract new industry and investments to the Volunteer State. Forecasts show that by 2018, Tennessee will have more than 100,000 jobs that rely heavily on strong educations in STEM (science, technology, engineering, and mathematics) – an increase of nearly 14,000 more STEM jobs than the state had in 2008. Tennessee must be poised to seize these new competitive opportunities and bolster its workforce with more STEM graduates to fully fuel its economic engines. A panel of Tennessee STEM students, educators, business leaders, and policy makers will discuss the initiatives that will lead to the state's innovative workforce of tomorrow.

WHEN:
Tuesday, Feb. 24
3pm - 4:30pm Central

WHERE:
The Old Supreme
Court Room
State Capitol Building
Nashville, TN
