1. Summary

Introduction

This supplement to the 2014-2015 Budget Document provides the detail of base budget changes required to balance the state budget. The proposal is comprised of specific agency program reductions (reduction plans) and other preliminary base budget reductions and adjustments.

The Summary section contains overviews of the reductions and other adjustments that compose the total reduction proposal. The first schedule is a combining statement of base budget reductions to general fund state appropriations. It is a departmental summary of the base reductions and preliminary base adjustments in total and on a recurring and non-recurring basis. The second schedule is a listing of the preliminary base adjustments by department, showing the recurring and non-recurring adjustments to the general fund along with adjustments to dedicated state appropriations. The third schedule is a departmental listing of the agency program reductions compared to the current-year recurring appropriations and the discretionary base appropriations for the upcoming budget year. Discretionary base appropriations exclude appropriations from dedicated taxes that are narrowly levied and earmarked for specific programs. It also excludes certain programs that are “held harmless” from reduction based on other statutory requirements or due to administration initiatives.

The Base Budget Reductions section presents the agency program reductions by funding source and position count. This section begins with a departmental summary of reductions, followed by a program summary of reductions, and is concluded with a detailed listing of the specific base budget reductions recommended.

9	Choosing Wisely Initiative - Treatment Decision Standards	Reduce state costs by helping patients, along with their physicians, choose care that is supported by evidence and truly necessary. Choosing Wisely is an initiative started by a group of national professional organizations interested in improving the efficiency and efficacy of medical care. Identified savings are achieved by prioritizing MRI / X-rays relating to acute back pain for medically necessary situations where they are of recognized value.

17	Reimbursement Rate for Brand-Name Drugs	Reduce the amount TennCare pays for brand name pharmaceuticals by increasing the discount off of the average wholesale price (AWP) to 15%. TennCare currently pays AWP less 13% for brand name products. With this reduction, TennCare would pay AWP less 15% for brand name products.
