
Approved High School Courses Policy 3.205

The Background:

T.C.A. § 49-1-302(a)(8) authorizes the State Board of Education to “set policies governing all curricula and courses of study in the public schools.” Additionally, Rules, Regulations, and Minimum Standards of the State Board of Education 0520-01-03-.05(1) calls for the State Board of Education to adopt standards for each subject area, grades K-12. The approved standards are to be the basis for planning instructional programs in each local school system.

This item includes new and revised courses within the Advanced Manufacturing; Agriculture, Food, & Natural Resources; Architecture & Construction; Arts, Audio/Visual Technology, & Communication; Business Management & Administration; Education & Training; Hospitality & Tourism; Health Science; Human Services; Information Technology; Marketing; STEM; and Transportation, Distribution, & Logistics career clusters that are now better aligned with postsecondary pathways, incorporate added instructional rigor, and reflect the competitive employment demands of our state. These new and revised standards have been created in collaboration with postsecondary faculty, industry representatives, and high school teachers. These changes will go into effect for the 2017–18 school year.

This item also includes the addition of a new statewide dual credit course: *Introduction to Sociology*. This course has successfully completed the entire three-year development and pilot cycle established under PC 967. This course has been approved by the Consortium for Cooperative Innovative Education (which includes Tennessee Board of Regents, the University of Tennessee system, the Tennessee Independent Colleges and Universities Association, the Tennessee Higher Education Commission, and the Tennessee Department of Education) to move out of pilot phase and into full statewide implementation. If approved by the board, this course will be available to all high schools in the state who meet the expectations of the SDC program, starting in fall 2017.

Career and Technical Education courses included in this item:

Advanced Manufacturing	
Manufacturing Practicum	Additional Standard

Agriculture, Food, & Natural Resources	
Supervised Agricultural Experience	Additional Standard

Architecture	
Construction Practicum	Additional Standard
