## **Building Tennessee's Tomorrow:**

## Anticipating the State's Infrastructure Needs

July 2007 through June 2012

## **Appendix C: Inventory Forms**

Two separate inventory forms were used to collect data for the July 2007 through June 2012 Public Infrastructure Needs Inventory on which this report was based. The General Inventory Form is used to record information about the need for new or improved infrastructure, including new schools. The Existing Schools Inventory Form is used to record additional information about the conditions and facility needs at existing public schools from kindergarten through high school.

Survey forms from the United States General Accounting Office (GAO) provided the original model for the forms used in the first inventory of infrastructure needs in Tennessee during 1997. Since that time, the inventory form has been further customized to best meet the requirements of Chapter 1101, Public Acts of 1998, and Chapter 672, Public Acts of 2000 (see Appendix A).

Staff from Tennessee's nine development districts use the inventory forms to gather information for the inventory from local government officials and agencies in each county. They include at a minimum

- county executives,
- · mayors,
- local planning commissions,
- local public building authorities,
- · local education agencies,
- · utility districts, and
- county road superintendents.

TACIR has tried to strike a balance between requiring sufficient information to satisfy the intent of the law and creating an impediment to local officials reporting their needs. By law, the inventory is required of TACIR, but it is not required of local officials. Local officials may decline to participate without penalty; similarly, they may provide only partial information, making comparisons across jurisdictions difficult. But with each annual inventory, participants have become more familiar with the process, and more supportive of the program.

Extensive efforts are made to ensure that the information collected is accurate and meaningful. Development district staff work closely with local officials to make sure they are accurately capturing information. After development district staff enter information into the inventory database, there are

extensive quality control programs run to make sure information is entered correctly and is internally consistent.

With each inventory, TACIR staff assess the potential for over or under-reporting by comparing reported needs to indicators of need, such as county size and population, and to factors related to ability to fund infrastructure, such as taxable property and sales.

## **State of Tennessee**

# **Tennessee Advisory Commission on Intergovernmental Relations** General Public Infrastructure Needs Inventory Form Includes K-12 New School Construction & System-wide Needs Include projects needed to be in some stage of development at any time between July 1, 2007, and June 30, 2027.

Record all information based on the project status as of July 1, 2007.

ī.	Project Identification: Number (	s (\$50,000) or greater to be included in this inventory of needs.

## State of Tennessee

Include projects needed to be in some stage of development at any time between July 1, 2007, and June 30, 2027.

Record all information based on the condition or project status as of July 1, 2007.

Each facility need at the school must involve a cost of fifty thousand dollars (\$50,000) or greater to be included in this inventory. A. SCHOOL IDENTIFICATION A1.School Number: A4. Grades Served: A unique number identifying the school system & the school, assigned by the TN Dept. of Education. A5.School Status: A2. School System Name: (i.e., Active, Inactive, Pending) Status Begin Date: \_ A3. School Name (legal name of the school): A6.Inventory County: \_ The county in which this school campus is located. **B. CAMPUS CONDITION AND NEEDS** B1. Construction year of main campus building: \_\_\_\_\_\_ (Indicate the year of construction for the main building on campus.) B2. Recent construction or renovations: (List each project that occurred within the last ten years if its cost was equal to or greater than \$50,000. List projects by type [e.g., new school, classroom, science lab, auditorium, cafeteria, library and gym projects should be listed separately]) Project Sq. Final Description Completed Code **Footage** Cost \$ \$ B3. Will the school use leased space to meet its facility needs? Yes or No\_\_\_ If yes, list the annual cost: \_\_\_\_\_ What is the term of the lease? Begin date: \_\_\_\_ End date: \_\_\_ B4. Are any of this school's facilities used by another educational institution for educational purposes? Yes or No: \_\_\_\_\_\_ If "yes," list the shared facility, the institution with which it is shared and the reason for sharing.

Shared Facility	Sharing Institution	Reason		
Example: Gymnasium	ABC Middle School	The middle school does not have a gym		

**B5.** Does this school use another institution's facilities for programs or classes because of inadequate facilities? Yes or No: \_\_\_\_\_\_\_ If "yes," list the institution, the facility used, and the reason.

Program	Institution	Reason
Library research class	XYZ Middle School	Our school's library is inadequate.

B6. Is there a plan to close this facility within the next five years? Yes or No: If "yes, provide the date of closure in the table below.  Is there a plan to replace this facility? Yes or No: If "yes," identify the replacement facility?							
Date of Planned Closure	Name of the Replacement School	Project or Replacement School					
B7.Is there a plan t	o change the function of this fa						

Date of Change	New Function

**B8.** List all technology infrastructure needs at this facility. Technology infrastructure includes capital assets such as electronic devices and computers. For purposes of this inventory, technology does not include application software (e.g., Accelerated Reader, MS-Office) or telecommunication devices (e.g., telephones, radios). Technology infrastructure needs may be included regardless of cost. All other needs included in this inventory must involve a capital cost of not less than fifty thousand dollars (\$50,000).

Technology Infrastructure Needs	Stage of Development	Estimated Cost
		\$
		\$
		\$

B9. Does this school building need any modifications in order to comply with federal or state mandates (excluding the state EIA)? Yes or No: \_\_\_\_\_\_ If "yes," complete the following table. Federal and state mandates are rules, regulations, or laws adopted by the federal or state governments that require a building modification in order to achieve compliance. Record a mandate need only if the entire cost is the result of a mandate. Costs associated with the Education Improvement Act of 1992 (EIA) are captured only in Section C; therefore, do not report EIA-related costs in this table. If there are other federal or state mandate needs not shown in the table, contact TACIR Staff.

Mandate	Description of Facility Modification Required	Stage of Development	Estimated Cost
Americans with Disabilities Act			\$
Asbestos			\$
Regulation of State Fire Marshal/Fire Codes			\$
Individuals with Disabilities Education Act of 1990			\$
Led-based paint Poisoning Prevention			\$
Tennessee Petroleum Underground Storage Tanks Act			\$

#### **FACILITY RATING SCALE:**

Excellent: can be maintained in a "like new" condition and continually meet all building code and functional requirements with only minimal routine maintenance.

Good: does not meet the definition of "excellent," but the structural integrity is sound and the facility can meet building code and functional requirements with only routine or preventive maintenance or minor repairs that do not hinder it's use.

Fair: structural integrity is sound, but the maintenance or repairs required to ensure that it meets building code or functional requirements hinder—but do not disrupt—the facility's use.

Poor: repairs required to keep the structural integrity sound or to ensure that it meets building code or functional requirements are costly and disrupt—or in the case of an individual component may prevent—the facility's use.

STAGE OF PROJECT: The current stage of development for a project recorded in the Public Infrastructure Needs Inventory should be recorded based on its status as of July 1, 2007, and it may be any one of the following:

Conceptual: identified as an infrastructure need with an estimated cost, but not yet in the process of being planned or designed.

Planning/Design: development of a set of specific drawings or activities necessary to complete a project identified as an infrastructure need.

Construction: actual execution of a plan or design developed to complete or acquire a project identified as an infrastructure need. If the project was reported in a prior survey, you may need to report the project stage as Complete or Canceled if work is no longer active.

**Completed:** construction or acquisition is concluded and the capital facility or land asset is available to provide the intended public benefit.

Canceled: terminated at any stage from conceptual through design or construction; eliminated from consideration for any reason other than completion; to be removed from the Public Infrastructure Needs

#### BIO. Using the facility rating scale provided above, list the number of facility components at this school by condition and estimate the cost to put all components in good condition. (Do not include costs recorded in previous sections or for EIA needs in section C.)

					Infrastructure needed to put fair or poor component good condition			
Component	Excellent	Good	Fair	Poor	Number of Components by Type of Project	Stage of development	Estimated Cost (must be ≥\$50,000)	Square Footage
Example:	2	10	6	2	6 to be upgraded	Conceptual	\$100,000	3,000
Classrooms (Permanent)		10	0	2	2 to be replaced	Plan & Design	\$150,000	1,000
Classrooms (Permanent)					to be upgraded		\$	
Classicollis (i erillalielic)					to be replaced		\$	
Classrooms (Portable)					to be upgraded		\$	
Classi doms (For table)					to be replaced		\$	
Specialized Science					to be upgraded		\$
