# Building Tennessee's Tomorrow: Anticipating the State's Infrastructure Needs

July 2019 through June 2024

#### APPENDIX C: INVENTORY FORMS

Two separate inventory forms were used to collect data for the July 2019 through June 2024 Public Infrastructure Needs Inventory on which this report was based. The General Inventory Form is used to record information about the need for new or improved infrastructure, including new schools. The Existing Schools Inventory Form is used to record additional information about the conditions and facility needs at existing public schools from kindergarten through high school.

Survey forms from the United States General Accounting Office (GAO) provided the original model for the forms used in the first inventory of infrastructure needs in Tennessee during 1997. Since that time, the inventory form has been further customized to best meet the requirements of Chapter 1101, Public Acts of 1998, and Chapter 672, Public Acts of 2000 (see Appendix A).

Staff from Tennessee's nine development districts use the inventory forms to gather information for the inventory from local government officials and agencies in each county. At a minimum, they include

- county executives,
- mayors,
- local planning commissions,
- local public building authorities,
- local education agencies,
- utility districts, and
- county road superintendents.

TACIR has tried to strike a balance between requiring sufficient information to satisfy the intent of the law and creating an impediment to local officials reporting their needs. By law, the inventory is required of TACIR, but it is not required of local officials. Local officials may decline to participate without penalty; similarly, they may provide only partial information, making comparisons across jurisdictions difficult. But with each annual inventory, participants have become more familiar with the process, and more supportive of the program.

Extensive efforts are made to ensure that the information collected is accurate and meaningful. Development district staff work closely with local officials to make sure they are accurately capturing information. After development district staff enter information into the inventory database, there are extensive quality control programs run to make sure information is entered correctly and is internally consistent.

With each inventory, TACIR staff assesses the potential for over or under-reporting by comparing reported needs to indicators of need, such as county size and population, and to factors related to the ability to fund infrastructure, such as taxable property and sales.

#### **State of Tennessee**

# **Tennessee Advisory Commission on Intergovernmental Relations** General Public Infrastructure Needs Inventory Form Includes K-12 New School Construction & System-wide Needs

Include projects needed to be in some stage of development at any time between July 1, 2019, and June 30, 2039.

Record all information based on the project status as of July 1, 2019.

Each project must involve a cost of fifty thousand dollars (\$50,000) or greater to be included in this inventory of needs.

	Each project must involve a cost of fif	ty triousaria dollars	(\$30	(000) of greater to be included in this inventory of needs.				
	Project Identification: Number	(A	nume	ic identifier auto generated by the system).				
I.	Project Name:							
10.	Is this project public infrastructure?    Yes or   No  Project Description: (do not repeat name or describe location; indicate size/scope if appropriate)

						\$			
						\$			
B9. Does this school building need any modifications in order to comply with federal or state mandates (excluding the state EIA)? Yes or No: If "yes", complete the following table. Federal and state mandates are rules, regulations, or laws adopted by the federal or state governments that require a building modification in order to achieve compliance. Record a mandate need only if the entire cost is the result of a mandate. Costs associated with the Education Improvement Act of 1992 (EIA) are captured only in Section C; therefore, do not report EIA-related costs in this table. If there are other federal or state mandate needs not shown in the table, contact TACIR Staff.									
Mandate		Description of Facility Modification Required	Stag Develo		Estin	nated Cost			
Americans with Disabilities Act					\$				
Asbestos					\$				
Regulation of State Fire Marshal/Fire Codes Individuals with Disabilities Education Act of 1990					\$				
Led-based paint Poisoning Prevention	on				\$				
Tennessee Petroleum Underground Storage Tanks Act	i				\$				

#### **FACILITY RATING SCALE:**

**Excellent:** can be maintained in a "like new" condition and continually meet all building code and functional requirements with only minimal routine maintenance.

**Good:** does not meet the definition of "excellent", but the structural integrity is sound and the facility can meet building code and functional requirements with only routine or preventive maintenance or minor repairs that do not hinder its use.

**Fair:** structural integrity is sound, but the maintenance or repairs required to ensure that it meets building code or functional requirements hinder—but do not disrupt—the facility's use.

**Poor:** repairs required to keep the structural integrity sound or to ensure that it meets building code or functional requirements are costly and disrupt—or in the case of an individual component may prevent—the facility's use.

**STAGE OF PROJECT**: The current stage of development for a project recorded in the Public Infrastructure Needs Inventory should be recorded based on its status as of **July 1, 2019**, and it may be any one of the following:

**Conceptual:** identified as an infrastructure need with an estimated cost, but not yet in the process of being planned or designed.

**Planning/Design:** development of a set of specific drawings or activities necessary to complete a project identified as an infrastructure need.

**Construction:** actual execution of a plan or design developed to complete or acquire a project identified as an infrastructure need. If the project was reported in a prior survey, you may need to report the project stage as Complete or Canceled if work is no longer active.

**Completed:** construction or acquisition is concluded and the capital facility or land asset is available to provide the intended public benefit.

**Canceled:** terminated at any stage from conceptual through design or construction; eliminated from consideration for any reason other than completion; to be removed from the Public Infrastructure Needs Inventory.

# B10. Using the facility rating scale provided above, list the number of facility components at this school by condition and estimate the cost to put all components in good condition. (Do not include costs recorded in previous sections or for EIA needs in section C.)

	t				Infrastructure nee	eded to put fair o good conditio		onents in
Component	Excellent	Cood	Fair	Poor	Number of Components by Type of Project	Stage of development	Estimated Cost (must be ≥\$50,000)	Square Footage
Example:	2	10	6	2	6 to be upgraded	Conceptual	\$100,000	3,000
Classrooms (Permanent)		10	6		2 to be replaced	Plan & Design	\$150,000	1,000

Facilities	to be replaced	\$

BIIa.	Rate the overall condition of the entire school. Consider the condition of the various components listed in question B10 and apply the definitions in the FACILITY RATING SCALE described there to the school as a whole.									
	☐ Excellent	☐ Good	☐ Fa	ir	□ P	oor				
BIIb.	Are there parts of this school not listed in item B10 that need to be upgraded or replaced (such as HVAC, roof, etc.) because they are not in good condition based of the scale described in question B10? Yes or No: If "yes", complete the following table. (In not include needs reported in questions B8 through B10, B12 or Section C.)									
	Description	Replace or	Stage of	Estimated	Таσ	Square				

Description	Replace or Upgrade	Stage of Development	Estimated Cost	Tag	Square Footage
<b>Example:</b> Entire Roof in poor condition	Replace	Conceptual	\$70,000		
			\$		
			\$		

**B12.** Do any new components need to be added to this school in order to accommodate the educational needs of its students and teachers? Yes or No: \_\_\_ If "yes", complete the following table. (Do not include needs reported in items B8 through B11. List new component needed because of the Education Improvement Act in Section C.)

#### Reason for addition (select one)

Population growth

Program expansion or addition

Consolidation/Rezoning

Adding pre-k classrooms

Type of Component	Number	Reason for Addition	Stage of Development	Estimated Cost	Square Footage
Example: Permanent Classrooms			Conceptual	\$100,000	3,000
				\$	
				\$	
				\$	

C.	<b>EDUCATION IMPROVEMENT ACT OF 1992 (EIA)</b> The EIA is a law enacted by the Tennessee General Assembly that, among other things, required smaller classes, and therefore more teachers, by the beginning of the 2019-20 school year. Record only EIA related costs here. Other costs related to facility condition (e.g., restrooms, libraries, etc.) should be reported in <b>Section B</b> .									
CI	.As of July 1, 2019, does this facility hav class-size standards? Yes or No									
C2	.If there are not enough classrooms, the classroom needs of the teachers employ 2019-20 (e.g., by using the stage in the gym a	yed to m	eet the EIA requi	irement in so	hool year					
<b>C</b> 3	.How many additional classrooms will th	is school	need to comply	with the EIA	in school					
C4	C4. Estimate the cost for the additional classrooms (permanent or portable) necessary to comply with the EIA teacher-pupil ratio in school year 2019-20.									
	Type of Classrooms to be Added by Stage of Development	Number	Stage of Development	Estimated Cost	Square Footage					
Exa	mple: Permanent Classrooms	6	Planning and Design	\$800,000	3,000
