Ladies and Gentlemen:

I am pleased to present to you the 2012 Crime in Tennessee report. The Tennessee Bureau of Investigation's Crime Statistics Unit, housed within the Information Systems Division, compiles and publishes this report based upon crime statistics submitted by all law enforcement agencies across the state. The crimes are reported to the Tennessee Incident Based Reporting System (TIBRS), which is the state's version of the FBI's National Incident Based Reporting System (NIBRS).

Incident based reporting views a crime and all of its components as an "incident." Information about the crime, including details about the offense, victim, offender, property, arrestees and the relationship between the people involved, are reported. Because of the extent of detailed data collected, the TIBRS program provides an even more accurate depiction of crime in each community than the Uniform Crime Report (UCR) published by the FBI.

The TIBRS program is a model for the nation and is successful because of the continued cooperation by Tennessee's law enforcement community. The TBI provides TIBRS training to commissioned and non-commissioned law enforcement personnel across the state. TBI is committed to this effort and will continue to provide the training and technical assistance necessary to collect the most accurate and comprehensive crime statistics for Tennessee and its citizens.

As always, we strongly discourage ranking of law enforcement agencies according to the statistics. There are too many demographic, socio-economic and other factors out of the control of law enforcement that contribute to the nature of the crimes committed. Crime varies from place to place, and ranking the agencies based solely on numbers would not be fair to the agencies or their communities.

I would like to thank all participating law enforcement agencies for their hard work and contributions to making this report a thorough and accurate picture of crime in Tennessee. It is only with their support that the state continues to maintain such a successful program.

Sincerely,

Mark Gwyn
Director

Introduction

Who reports?

All law enforcement agencies as well as colleges and universities are mandated to report crime statistics monthly to the TBI. The enclosed reports for the following agencies do not contain complete data for 2012 which is noted on each of their pages. This report is based upon a "snapshot" of the database as of March 12, 2013. As the agencies update their 2012 data, the changes will be reflected at www.tncrimeonline.com

What is incident based reporting?

Incident based reporting views a crime and all of its components as an "incident". In order to obtain important information, facts recorded and preserved about the incident are organized into specific categories or segments. The vehicle used for recording these facts is a "data element". Data elements provide information about crime and its involvement with victims, offenders, property, arrestees, etc.

What is TIBRS?

The Tennessee Incident Based Reporting System (TIBRS) program is an incident based reporting system designed to collect information on every single crime occurrence and on each offense and arrest within the occurrence. The most significant difference between TIBRS and traditional Uniform Crime Reporting (UCR) system is the degree of detail in reporting. TIBRS collects information on 22 crime categories made up of 47 specific offenses (Group A Offenses) compared to the UCR Summary reporting system that collects only 8 Part 1 Offenses. Additionally, arrests are reported for 11 Group B offense categories in TIBRS. Under the UCR Summary system, only the most serious offense was

reported. In TIBRS up to 10 offenses can be reported within the same incident and each offense is counted as a crime. Because of the differences between UCR summary data and TIBRS data, any cross comparisons would provide inaccurate results in trend analysis.

Pitfalls of Ranking

In the past, crime data has been used to compile rankings of individual jurisdictions and institutions of higher learning. These crude and/or incomplete analyses have often created misleading perceptions which adversely affect geographic entities and their residents. The FBI has a long standing policy against ranking cities, counties, states and universities/ colleges on the basis of crime data alone and the TBI concurs.

Local agencies should not be ranked because there are many factors that cause the nature and type of crime to vary from place to place. TIBRS statistics include only jurisdictional figures along with reported crime, clearance or arrest data. Rankings ignore the uniqueness of each locale. All jurisdictions are affected in some degree by:

- Population density and degree of urbanization of the locality and surrounding area;
- Variations in composition of the population;
- Number of residents vs. the “policing population” i.e., residents plus daily commuters, transients, tourists, shoppers, etc.;
- Economic conditions;
- Modes of transportation and highway systems;
- Cultural conditions;
- Family conditions with respect to divorce and family cohesiveness;
- Climate;
- Effective strength of law enforcement;
- Administrative and investigative emphases of law enforcement; and/or
- Policies of other components of the criminal justice system, i.e., prosecutorial, judicial, correctional, and probational.

The attitudes of a jurisdiction’s citizenry toward crime and the crime reporting practices of its residents are known to have an effect on the number of crimes coming to the attention of law enforcement.

Because of concerns regarding the proper use of TIBRS data, the TBI has the following policies:

- The TBI will not analyze, interpret, or publish crime statistics based solely on a single dimension of interagency ranking;
- The TBI will not furnish agency-based crime statistics to data users in a ranked format; and
- When providing/using agency-oriented statistics, the TBI cautions and, in fact, strongly discourages data users against using rankings to evaluate locales or the effectiveness of their law enforcement departments.

Crime Rates

Crime rates in *Crime in Tennessee* reflect all 22 Group A Offense Categories. Crime rates in the FBI's *Crime in the United States* are only based upon 8 Index Offenses. The crime rates in the TIBRS publications will be a more accurate reflection of the crime occurrences in the state.

$$\text{Crime Rate} = \frac{\text{Number of Offenses}}{\text{Population}} \times 100{,}000$$

Population Estimates

The population data is from the 2011 U.S. Census information.

Trends

The 2012 Crime in Tennessee is based solely upon incident data. Data submitted by the TBI to the FBI is converted from incident based statistics to the summary system of reporting. In the FBI data, only the most serious of the eight Index crimes are reported. The number of victims is counted if the most serious offense is homicide, assault, kidnapping, or rape. We strongly discourage attempting to compare the TIBRS data for 2012 to any data previously released by the FBI in the Crime in the United States publications. The data sets are not comparable due to the number of types of crimes reported and the reporting of all offenses in an incident in the TIBRS program. Trend information for the state is included in the statewide section of the report.

Crime Counts

All crimes reported in Crime in Tennessee are based upon offenses that occurred in 2012. If a person was arrested in 2012 for a crime that occurred in a previous year, the arrest statistics will not be included in the 2012 counts.

Differences between TIBRS and FBI released data

TIBRS collects information on up to 10 offenses occurring in the same incident. Information is collected on the offense circumstances, victims, offenders, arrestees, and property. There are 22 Group A offense categories with 47 separate offenses. Group B offenses which include DUI, Drunkenness, and Bad Checks provide arrest information only.

The FBI summary system applies a hierarchal rule and only collects information on the most serious offense in an incident and ignores other offenses. Information is only reported on 8 Index Crimes. Only arrest information is reported for other offenses including drugs, forgeries and frauds.

CRIME IN TENNESSEE

2012

STATE AGENCIES

NOTE: The great majority of state level law enforcement agencies are not first responders to crime incidents but provide investigative, technical, or forensic support to other agencies including sheriff's departments, municipal police departments, and drug task forces.

The agencies that utilize the investigative, technical, or forensic support provided by these state level law enforcement agencies most often are first responders, and therefore it is their responsibility to submit crime statistics to the TIBRS program and the numbers will be included in their data. Reports are not submitted by state level agencies in these cases in order to avoid duplicate reporting and the resulting inflated statistics and inaccurate data.
