GOVERNOR

## **TDOT Inventory of Barriers Along State Highways**

The Department, using our own resources, began data collection to develop a curb ramp inventory identifying current conditions. The field work has since been completed and a GIS database developed to identify the total number of curb ramps, missing curb ramps, as well as evaluated existing curb ramps to ensure compliance with current PROWAG standards along the state highways. The summary of the Department's review process identifying inventory of barriers as follows.

- Ramps which appear to be consistent with PROWAG and TDOT Standards:
  - **Approximately 25,500**
- Ramps which appear NOT to be consistent with either PROWAG or TDOT's current curb ramp Standard Drawings (MM-CR-2 through MM-CR-8):
  - **Approximately 1,600**
- Locations where a curb ramp is missing but sidewalks or other pedestrian facilities exist:
  - **Approximately 3,100**
- Total curb ramps on state highway system:
  - **Approximately 30,000**
