

The Labor Market Report

Labor Surplus Areas 2013

February 2013

Bill Haslam, Governor

Department of Labor and Workforce Development

civil jurisdictions with higherthan-average unemployment rates. Employers in these LSAs may be given preference in bidding on federal procurement contracts. The purpose in providing such preference is to help direct government funding into areas where people are in the most severe economic need. The civil jurisdictions used are defined as all cities with a population of at least 25,000 and all counties. Counties are considered civil jurisdiction if they do not have one of the civil jurisdiction cities already noted. The remain-

Labor surplus areas (LSAs) are

What Qualifies?

ing areas of a county that include

a larger city are denoted as

'balance of county' areas.

A civil jurisdiction becomes a labor surplus area when its average unemployment rate is at least 20 percent above the average unemployment rate for all states during the previous two calendar years. During periods of high national unemployment, this 20 percent is disregarded and areas are classified as LSAs if the unemployment rate during the previous two calendar years is 10 percent or more. This 10 percent ceiling comes into effect whenever the two-year average unemployment rate for all states is above 8.3 percent. Similarly, a floor of 6 percent is used during periods of low national unemployment in order to qualify as a labor surplus area. The 6 percent floor

comes into effect whenever the average unemployment rate for all states during the two-year reference period is less than 5 percent.

The U.S. Department of Labor issues a list of LSAs each fiscal year, which becomes effective on October 1 and ends the following September 30. The reference period used in preparing the current list was January 2010 through December 2011. The national average unemployment rate during this period was 9.4 percent. The qualifying rate for a FY 2012 labor surplus area classification is 11.2 percent or above. However, the ceiling unemployment rate is 10 percent. Therefore, all areas above 10 percent qualify as labor surplus areas.

Some counties that do not qualify have current rates substantially higher than 10 percent. These areas were lower during the beginning of 2010 and do not meet qualifications. These counties have experienced both significant and projected long-term increases in unemployment and may be eligible under exceptional circumstances. The exceptional circumstances provision is a written petition requesting inclusion as an LSA by the state workforce agency to the U.S. Department of Labor's Employment and Training Administration.

The current conditions for exceptional circumstances classification are as follows: an area unemployment rate of at least 10 percent for each of the three most recent months, projected unemployment of at least (Continued on Page 2)

2013 Tennessee Labor Surplus Area List

Bedford County Hardin County Meigs County Benton County Monroe County Haywood County Bledsoe County Henderson County Morgan County Campbell County Henry County Obion County Carroll County Hickman County Overton County Claiborne County **Houston County** Perry County Clay County Humphreys County Pickett County Cocke County Polk County Jackson County Crockett County Jefferson County Rhea County Cumberland County Johnson County Scott County Decatur County Lake County Sevier County Dyer County Shelby County Lauderdale County Favette County Lawrence County Memphis city Fentress County Lewis County Stewart County Gibson County Madison County Tipton County Trousdale County Giles County Jackson city Unicoi County Grainger County Marion County Greene County Marshall County Van Buren County **Grundy County** Maury County Warren County Hamblen County Balance of Maury County Wayne County Morristown city Columbia city Weakley County Hancock County McMinn County White County McNairy County Hardeman County

Labor Surplus Areas (Continued)

10 percent for each of the next 12 months, and documented information that the exceptional circumstances event has already occurred.

Who Uses this Information?

The labor surplus areas are used by the federal government to identify where procurement should be emphasized to strengthen that area's economy. It is used by the Small Business Administration for selections of small business awards in Historically Underutilized Business Zones. State and local governments use the LSA data to allocate assistance for programs like Food Stamps and other training programs. Private industry uses LSA information for strategic planning. They know these areas have large numbers of eligible workers.

There are 5,678 civil jurisdictions in the United states with 1,628 labor surplus areas (28.7 percent). The state with the greatest percentage of labor surplus areas is Rhode Island at 82.6 percent. Iowa, Nebraska, New Hampshire, Vermont, and Wyoming have no labor surplus areas in their states. The southeastern state with the highest percentage of labor surplus areas is Mississippi (67.0 percent) while Louisiana (15.9 percent) was the lowest. Tennessee has 146 civil jurisdictions with 64 that are labor surplus areas (43.8 percent).

Due to Tennessee's high unemployment the above list contains areas that have an unemployment rate that is less than 10 percent and are labor surplus areas from October 1, 2012, through September 30, 2013.

NONFARM EMPLOYMENT & LABOR FORCE NARRATIVE

Total nonfarm employment increased by 54,200 jobs from February 2012 to February 2013. There was a large seasonal increase in professional/business services (up 18,100 jobs), which included increases of 10,200 jobs in administrative/support/waste management and 6,200 jobs in professional/scientific/technical services. Other large increases were in accommodation/food services (up 10,400 jobs), which included an increase of 8,900 jobs in food services/drinking places; retail trade (up 9,300 jobs), which included an increase of 2,400 jobs in clothing/clothing accessories stores; health care/social assistance (up 8,200 jobs), which included increases of 5,500 jobs in ambulatory health care services and 2,500 jobs in social assistance; and transportation equipment (up 7,900 jobs). There were smaller increases in transportation/warehousing (up 2,700 jobs), other services (up 2,400 jobs), and finance/ insurance (up 2,200 jobs).

These increases were partially offset by declines in local government (down 4,700 jobs), mining/logging/construction (down 1,500 jobs), and information (down 1,300 jobs).

During February 2013 nonfarm employment increased by 17,400 jobs. Most of the job increases were in the service-providing industries. There were monthly seasonal increases in professional/business services (up 6,000 jobs), which included increases of 3,400 jobs in professional/scientific/technical services and 2,500 jobs in administrative/support/waste management; state government educational services (up 5,100 jobs); educational/health services (up 3,900 jobs), which included increases of 2,700 jobs in educational services and 1.100 jobs in social assistance: accommodation/food services (up 2,700 jobs), which includes an increase of 2,000 jobs in food services/drinking places; and local government and other services (both up 1,700 jobs). The only large decline was in retail trade (down 3,300 jobs). Most of this decline was in general merchandise stores (down 1,700 jobs) and clothing/clothing accessories stores (down 1,400

Tennessee's seasonally adjusted estimated unemployment rate for February 2013 was 7.8 percent, up 0.1 percentage point from the January 2013 rate.

The United States unemployment rate was 7.7 percent in February 2013. In February 2012, the national unemployment rate was 8.3 percent while the state rate was 8.0 percent.

Across Tennessee, the unemployment rate decreased in 87 counties, increased in five counties, and remained the same in three counties. Nineteen counties had rates of 7.5 percent or less, including eight in Nashville and four in Knoxville. In February 2013, the lowest rate was in Williamson County (5.3 percent) while the highest was in Scott County at 17.4 percent, down from 18.1 percent in January.

The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data are based on the 2012 benchmark.

					-	-						

Total nonfarm employment decreased by 2,000 jobs from January 2013 to February 2013. There were seasonal increases in educational/health services and state government (both up 500 jobs); professional/business services (up 400 jobs); leisure/hospitality (up 300 jobs); and other services and local government (both up 200 jobs). This was partially offset by a decrease of 300 jobs in retail trade.

During the past 12 months, nonfarm employment increased by 2,100 jobs. During that time, goods-producing jobs declined by 200, while service-providing jobs increased by 2,300.

Local Government	59.1	57.8	58.6	-0.5	0.8

Total nonfarm employment increased by 7,200 jobs from January 2013 to February 2013. There were seasonal increases in leisure/hospitality (up 2,600jobs); professional/business services (up 2,600 jobs), which includes increases of 1,300 jobs in administrative/support/waste management and 1,200 jobs in professional/scientific/technical services; educational/ health services (up 2.200 jobs), which includes increases of 1,300 jobs in health care/social assistance and 900 jobs in educational services; state government (up 1,000 jobs); other services (up 800 jobs); mining/ logging/construction (up 500 jobs); and wholesale trade (up 300 jobs). This was partially offset by decreases in retail trade (down 2,300 jobs), durable goods manufacturing (down 300 jobs), and local government (down 200 jobs).

0

During the past 12 months, nonfarm employment increased by 30,000 jobs. During that time, goods-producing jobs increased by 4,700, while service-providing jobs increased by 25,300.
