## Unmarried and Single Americans Week

"National Singles Week" was started by the Buckeye Singles Council in Ohio in the 1980s to celebrate single life and recognize singles and their contributions to society. The week is now widely observed during the third full week of September as "Unmarried and Single Americans Week". This year, that is September 20-26. The week is an acknowledgment that many unmarried Americans do not identify with the word "single" because they are parents, have partners, or are widowed. The following statistics from the U.S. Census Bureau will also include unmarried adults who were never married, widowed, or divorced, unless otherwise noted.

## Single Life

There were 95.9 million unmarried Americans over 18 in 2008. This is 43 percent of the entire population over 18. Of those single persons, 61 percent have never been married, while 24 percent were divorced and 15 percent were widowed. Of the entire unmarried group, 53 percent are women and 16 percent are over 65 years old ( 15.8 million older singles). There are 87 single men, over 18 years old for every 100 single women.

Forty-five (45) percent of all American households (52.9 million households) are maintained by unmarried men or women. Twentyeight percent of all households (32.2 million) are comprised of persons living alone. This is up from 17 percent in 1970.

## Parenting

There were 6.2 million unmarried households in 2007. These included 5.5 million of the opposite-sex and 700,000 same-sex partners. Many of these households include a biological child of one of the persons. Thirty-eight (38) percent of the opposite-sex, unmarried-partner households included at least one biological child of either partner.

In 2008, there were 11.6 million single parents that lived with their children. Of that amount, 9.8 million ( 84 percent) were single mothers. This is because one-third of all women between the ages of 15 and 50 with a birth in the last 12 months were either widowed, divorced, or never married. About 199,000 were living with an unmarried partner. There were also 743,000 unmarried grandparents who were caregivers for their grandchildren in 2007. They comprised about three in 10 grandpar-
ents who were responsible for their grandchildren.

## Other Information

Of the unmarried people age 25 and older in 2008, 84 percent were high school graduates and 24 percent had a bachelor's degree or more. There are 904 dating service establishments nationwide, as of 2002. These establishments, which include Internet dating services, employed nearly 4,300 people and generated $\$ 489$ million in revenues. This number is severely undercounted as new Internet dating services appear daily.

The 2008 elections (at all levels) were drastically changed by the voting patterns of single and unmarried Americans. Thirty-eight percent of the voters in the 2008 presidential election were unmarried.

Editor's note: The preceding data were collected from a variety of sources and may be subject to sampling variability and other sources of error. Questions or comments should be directed to the Census Bureau. Public Information Office: Telephone: 301-763-3030; fax: 301-763-3762.

## Back to School: 2009-2010

Summertime is winding down. Summer vacations coming to an end signal that back-to-school time is near. It's a time that many children eagerly anticipate catching up with old friends, making new ones, and settling into a new daily routine. Parents and children alike scan the newspapers and Web sites looking for sales to shop for a multitude of school supplies and the latest clothing fads and essentials. This article highlights the many statistics associated with the return to classrooms by our nation's students and teachers.

## Shopping

There was $\$ 7.6$ billion spent at clothing stores in August 2008 getting children ready for the school year. Only in December were sales significantly higher. There was also $\$ 2.4$ billion spent at bookstores during the same time period. The choices of retail establishments abound: In 2006, there were 25,430 family clothing stores, 6,417 children and infants clothing stores, 26,699 shoe stores, 9,425 office supply and stationery stores, 23,270 sporting goods stores, 10,989 bookstores, and 9,969 department stores.

## About Schools

There were 98,793 public schools in 2006-2007 and 3,970 public charter schools. These charter schools, exempt from selected state and local rules and regulations, enrolled 1.2 million students. There were 28,218 private schools in 2007-2008. There were 4,252 degree-granting colleges and universities in 2007. All of these schools employ 7.2 million teachers.

Elementary and middle schools employ 2.9 million teachers. The remainder ( 4.3 million) includes those teaching at the postsecondary, secondary, preschool, and kindergarten levels. As of 20072008, the national average pay for teachers was $\$ 50,758$ and high school principals earned an average of $\$ 97,486$. Public school teachers in California earned $\$ 63,640$ as of the 2006-2007 school year - the highest of any state. Teachers in South Dakota received the lowest pay - $\$ 35,378$. Bus drivers earned $\$ 16.56$ per hour, while custodians earned $\$ 14.19$, and cafeteria workers made $\$ 11.60$.

The average per-pupil expenditure on public elementary and secondary educa-
tion nationally was $\$ 9,666$ in 2007. New York $(\$ 15,981)$ spent the most among states, followed by New Jersey $(\$ 15,691)$ and the District of Columbia ( $\$ 14,324$ ). Utah $(\$ 5,683)$ spent the least per student, followed by Idaho $(\$ 6,625)$ and Tennessee $(\$ 7,113)$.

## By-the-Numbers

Twenty-seven (27) percent of the population older than 3 years old were enrolled in anywhere from nursery schools through college. These people in school (totaling 76 million) include all adults in 2007.

Fifty-five (55) percent of all 3- and 4-year olds were enrolled in schools in October 2007. Seventy-one (71) percent of all 3 - to 6 -year-old children were enrolled in all-day kindergartens. There are 56 million children projected to be enrolled in the nation's elementary through high schools (grades K-12) this fall. Of that number, 11 percent are expected to be enrolled in private schools. Of all elementary through high school students enrolled in October 2007, 42 percent of the students are minorities and 23 percent have at least one foreign-born parent.

Twenty-six (26) percent of all children ages 6 to 11 who had ever been enrolled in first grade or higher had changed schools at some point as of 2006. Forty-two (42) percent of all children ages 12 to 17 who had ever been enrolled in first grade or higher had changed schools at some point as of 2006. This does not include the normal progression and graduation from elementary and middle schools. Twelve (12) percent of all children ages 6 to 11 participated in lessons, sports, and clubs as of 2006. Lessons include those taken after school or on the weekend in subjects such as music, dance, language, computers, or religion.

Six (6) percent of all children ages 6 to 11 have repeated a grade at some point as of 2006. Eleven (11) percent of all children ages 12 to 17 have repeated a grade. Twothirds of all parents reported that their children ages 6 to 17 like school.

One-half of all children in California in grades K-12 had at least one foreign-born parent. This was followed by Nevada (36 percent). In New York, Florida, Texas, Arizona, New Jersey, and Hawaii, at least 25 percent of all students had a foreignborn parent.

Twenty-one (21) percent of children enrolled in kindergarten through $12^{\text {th }}$ grade speak a language other than English at home. There are 10.9 million school-age children where English is their second language. California, which leads all states, has 45 percent of its children who speak a language other than English. This is followed by Texas ( 35 percent), New Mexico (34 percent), and Arizona (32 percent). Spanish is spoken by 7.9 million of these children.

## In College

The United States projects that 19 million people will be students this fall in the colleges and universities. This is up from 13.5 million 20 years ago. Fifteen (15) percent of all these students in October 2007 were over 35 years old. These older students accounted for 36 percent of part-time college students. Almost one-half (49 percent) of all 18 - and 19 -year-olds were enrolled in college in 2007. Two-thirds of all undergraduates were enrolled in four-year colleges in October 2007. Of those enrolled in four-year colleges, 82 percent attended full-time. Women comprised 55 percent of all undergraduates and 60 percent of all graduate students in October 2007.

The average cost for tuition, room, and board (for in-state students) at the nation's four-year public colleges and universities was $\$ 14,915$ for an entire academic year in 2007-08. The average cost for tuition, room, and board at the nation's four-year private colleges and universities was $\$ 40,640$ for an entire academic year in 2007-08. The costs of public and private colleges is more than double the cost in 1990.

## The Payoff

Workers 18 and older with an advanced college degree averaged yearly earnings of $\$ 80,977$ in 2007. Workers with a bachelor's degree averaged yearly earnings of $\$ 57,181$, while those with a high school diploma earned $\$ 31,286$. This compares with $\$ 21,484$ for those without a high school diploma.

The highest starting salary for a bachelor's degree candidate was $\$ 75,621$ in 2008. These were persons who majored in petroleum engineering. At the other end of the spectrum were those majoring in a social science, who were offered an average of \$39,476.

## NONFARM EMPLOYMENT AND LABOR FORCE IN TENNESSEE

Total nonfarm employment decreased by 127,200 jobs from June 2008 to June 2009. During this period, there were large seasonal decreases in mining/construction (down 26,600 jobs); professional/business services (down 23,400 jobs), which includes a decline of 16,300 jobs in administrative/support/waste management and 6,300 jobs in professional/scientific/technical services; transportation equipment manufacturing (down 15,700 jobs); retail trade (down 12,200 jobs), which includes declines of 2,900 jobs in general merchandise stores and 2,700 in motor vehicle/parts dealers; transportation/warehousing (down 9,000 jobs), which includes a drop of 6,300 jobs in truck transportation; financial activities (down 8,100 jobs), which includes a decrease of 5,500 jobs in finance/insurance and 2,600 jobs in real estate/rental/leasing; wholesale trade (down 7,900 jobs), which includes a decline of 4,700 jobs in durable goods wholesalers and 2,700 jobs in nondurable goods wholesalers; fabricated metal product manufacturing and accommodation (both down 5,600 jobs); information (down 4,800 jobs); and other services (down 3,800 jobs). This was partially offset by increases in local government (up 12,900 jobs); health care/social assistance (up 10,100 jobs), which includes an increase of 4,800 jobs in hospitals, 4,100 jobs in ambulatory health care services, and 2,300 jobs in nursing/residential care facilities; arts/entertainment/recreation (up 1,600 jobs); and 1,100 jobs in federal government.

During June, nonfarm employment decreased by 18,100 jobs. The largest seasonal decreases were in local government educational services (down 24,500 jobs); state government educational services (down 4,200 jobs); transportation equipment manufacturing (down 3,400 jobs); professional/business services (down 2,700 jobs), which includes a decline of 1,700 jobs in administrative/support/waste management; and educational services (down 1,300 jobs). This was partially offset by increases in leisure/hospitality (up 5,000 jobs), which includes an increase of 3,600 jobs in arts/entertainment/recreation and 1,400 jobs in accommodation/food services; and health care/social assistance (up 3,100 jobs), which includes an increase of 1,200 jobs in nursing/residential care facilities.

Tennessee's seasonally adjusted estimated unemployment rate for June 2009 was 10.8 percent, up 0.1 percent from the May rate. This is the 23 rd consecutive month that the current rate is greater than or equal to the national average.

The United States' unemployment rate was 9.5 percent in June 2009. In June 2008, the national unemployment rate was 5.6 percent, and the state's unemployment rate was 6.4 percent.

Across Tennessee, the unemployment rate increased in 84 counties, decreased in eight counties, and remained the same in three counties. There were only 13 counties with an unemployment rate less than 10 percent, and 21 counties had unemployment rates greater than 15 percent. The lowest rate occurred in Lincoln County at 7.1 percent, up 0.6 percent from the previous month. The highest rate was Perry County's 22.1 percent, down from 24.2 percent in May 2009.

Total nonfarm employment decreased by 1,600 jobs from May 2009 to June 2009. There were seasonal decreases in local government (down 1,400 jobs), retail trade (down 300 jobs), and professional/business services (down 200 jobs). This was partially offset by an increase of 300 jobs in accommodation/food services.

During the past 12 months, nonfarm jobs decreased by 8,000 . During that time, goodsproducing jobs decreased by 3,700 , while service-providing jobs declined by 4,300 .

TENNESSEE UNEMPLOYMENT RATES
(Seasonally Adjusted)

[^0]:    The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data is based on the 2008 benchmark.
