Per Capita Personal Income 2020

About Per Capita Personal Income

Per capita personal income is defined as the annual total personal income of residents divided by the residential population as of July 1. Personal income is derived by summing the net earnings, rental income, personal dividend/interest income, and transfer payments by place of residence. Personal income excludes federal income tax deductions and other personal taxes and is reported in current dollars. In simpler terms, it is the total income on the front page of your 1040 tax form. This data can be influenced by large growth (or decline) in population, natural disasters (i.e., flooding or hurricanes), commuting populations (those that primarily work in other counties), and state and local taxes.

According to the U.S. Bureau of Economic Analysis, the 2020 Tennessee per capita personal income was \$51,046, up 4.0 percent from the previous year. The United States per capita personal income was \$59,510, up 5.8 percent from 2019.

Tennessee County Incomes

In 2020, the Tennessee counties with the highest per capita personal income were Williamson County (\$94,748), Davidson County (\$71,659), Fayette County (\$59,214), Hamilton County (\$55,911), Knox County (\$54,642), Shelby County (\$53,855), Wilson County (\$53,628), Loudon County (\$53,519), and Sumner County (\$52,403). These nine counties are the only ones with per capita income greater than that of the sate. Only Williamson County and Davidson Counties had per capita income greater than the United States. All of these counties are in one of the four largest Metropolitan Statistical Areas (MSA).

In 2015, these same nine counties were also the highest and the only ones with per capita incomes greater than the state's.

The counties with the lowest per capita income in 2020 were Lake County

(\$25,921), Bledsoe County (\$29,572), Hancock County (\$31,243), Wayne County (\$32,631), Trousdale County (\$32,960), Hardeman County (\$33,036), Morgan County (\$33,373), Scott County (\$33,425), and Van Buren County (\$34,084).

In 2015, the ranking (from the bottom) was Lake County, Bledsoe County, Hancock County, Wayne County, Lauderdale County, Hardeman County, Morgan County, Jackson County, and Scott County.

Among counties with per capita incomes lower than the state in 2020, Blount County had the highest at \$48,601. The disparity between Blount County and the state's lowest, Lake County, was \$22,680. Despite the fact that the per capita incomes of 86 counties fall within that range, it was still more narrow than the \$23,089 disparity between the state's two highest counties, Williamson and Davidson.

Interestingly, Williamson and Davidson counties were the only two counties in the state to see a decline in income from 2019 to 2020. The largest absolute increase occurred in Chester County (up \$3,562) while the largest proportional increase occurred in Wayne County (up 10.4 percent).

Despite its 2020 decrease, Davidson still saw the largest absolute increase since 2015 (up \$15,787). Lauderdale County saw the highest percentage increase during this span (up 34.1 percent). Only Trousdale County had a lower per capita income in 2020 than in 2015, down \$2,157 or 6.1 percent. Of the 94 counties that increased since 2015, Williamson saw by far the lowest growth in both absolute and percentage terms at \$1,675 and 1.8 percent. Greene County was the next lowest with per capita income growth of \$4,061 or 11.5 percent since 2015.

More regional and local personal income data is available from the Bureau of Economic Analysis at https://www.bea.gov/data/income-saving/personal-income-county-metro-and-other-areas.

Construction	+14,500
Durable Goods Manufacturing	+11,800

Monthly Unemployment Rates	Counties
Increased	95
Decreased	0
Unchanged	0
Highest/Lowest Rate	Rate
Williamson County	2.8%
Perry County	6.8%

The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data are based on the 2021 benchmark.
