Mass Layoff Statistics Program

Special Points of Interest:

- Mass Layoff Statistics (MLS) program tracks layoffs/closures of large firms in Tennessee
- Tennessee Historical Civilian Labor Force Series, 1981 to Present
- County Unemployment Rates
- Civilian Labor Force Summary (All Areas)
- Hours and Earnings
- State Unemployment Insurance Activities
- Consumer Price Index

Inside This Issue:

Chattanooga MSA	7
Knoxville MSA	8
Memphis MSA	9
Nashville MSA	10
Smaller MSAs	11
Consumer Price Index	12

The Mass Layoff Statistics (MLS) program is a federal-state cooperative program, administered by the Bureau of Labor Statistics, that collects data on mass layoff actions that result in workers being separated from their jobs. If an establishment has at least 50 initial claims for unemployment insurance filed against them during a five-week period then it is considered a mass layoff event. The MLS program uses establishment information in conjunction with unemployment claims data to identify, describe, and track these major job cutbacks. Unemployment insurance claimants are identified by such demographic characteristics as age, race, gender, ethnicity, and place of residence. The program yields information on an individual's entire period of unemployment up to the point when regular State UI benefits are discontinued or exhausted.

An extended mass layoff occurs when 50 or more initial claims have been filed for unemployment insurance and the employer indicates that at least 50 persons have been separated from their

job for more than 30 days. These data are collected and released quarterly. Some states, including Tennessee, have extended mass layoffs when only 45 or more initial claims have been filed. The major reasons cited for long-term mass layoffs include cost control, bankruptcy/reorganization, financial difficulties from national economic downturns, and annual seasonal layoffs. Employer contacts are made in order to confirm that there was an extended mass layoff.

Tennessee's Numbers

When looking at the data provided on page 2, the universe for this program is total establishments. Establishments, in MLS, are counted as all firms with more than 45 employees. Smaller firms are not part of this database.

Large manufacturing establishments account for only 5.5 percent of all establishments in Tennessee. However this industry accounted for 61.6 percent of all initial claims in 2008, 54.4 percent of all initial claims in 2009, 24.6 percent of all initial claims in 2010, and 25.9 percent of all initial

claims during the first three quarters of this year. Manufacturing industries accounted for 50.6 percent of all separations in 2008 and have trended downward to 29.9 percent of all separations in 2011.

The two largest industries, based on the number of establishments, are professional/technical services (14,192 firms) and retail trade (14,125 firms). These two industries account for 23.9 percent of all Tennessee establishments. These two large industries accounted for 11.7 percent (in 2008), 15.6 percent (in 2009), 19.2 percent (in 2010), and 25.4 percent (in 2011) of all separations in the state. These same industries accounted for 8.6 percent (in 2008), 12.8 percent (in 2009), 18.4 percent (in 2010), and 26.5 percent (in 2011) of all initial claims in the state. The percentages of separations and initial claims have risen each year during this time period. During the first three quarters of this year, for the first time, the percentages separations and initial claims are greater than the percentage of establishments.

NONFARM EMPLOYMENT AND LABOR FORCE IN TENNESSEE

Total nonfarm employment increased by 24,500 jobs from October 2010 to October 2011. This includes seasonal increases in local government educational services (up 11,500 jobs); health care/social assistance (up 5,500 jobs), which includes increases of 3,700 jobs in nursing/residential care facilities and 2,400 jobs in ambulatory health care services; transportation equipment manufacturing (up 3,800 jobs); mining/logging/construction (up 3,600 jobs); professional/business services (up 3,600 jobs), which includes increases of 2,300 jobs in professional/scientific/technical services and 1,300 jobs in management of companies/enterprises; food services/drinking places (up 3,100 jobs); and food/beverage stores, machinery manufacturing, and fabricated metal products (each up 1,700 jobs). This was partially offset by decreases in gasoline stations (down 1,400 jobs), information (down 1,100 jobs), and nonmetallic mineral products (down 1,000 jobs).

During October, nonfarm employment increased by 12,100 jobs. This included seasonal increases in local government educational services (up 7,500 jobs); educational/health services (up 4,100 jobs), which includes increases of 2,300 jobs in educational services and 1,800 jobs in health care/social assistance; retail trade (up 1,800 jobs), which includes increases of 1,600 jobs in general merchandise stores and 1,300 jobs in clothing/clothing accessories stores; and administrative/support/waste management (up 1,600 jobs). This was offset by decreases in leisure/hospitality (down 2,000 jobs), which includes a decrease of 1,800 jobs in arts/entertainment/recreation; and mining/logging/construction (down 1,000 jobs).

Tennessee's seasonally adjusted estimated unemployment rate for October 2011 was 9.6 percent, down 0.2 percentage point from the revised September 2011 rate.

The United States' unemployment rate was 9.0 percent in October 2011. In October 2010, the national unemployment rate was 9.7 percent, and the state's unemployment rate was 9.4 percent.

Across Tennessee, the unemployment rate decreased in 92 counties, increased in one county, and remained the same in two counties. There were 47 counties with an unemployment rate less than 10 percent, and two counties had a rate at or above 15 percent. In September, the lowest rate occurred in Lincoln County at 5.8 percent, down 0.8 percentage point from the previous month. The highest rate was Scott County's 18.1 percent, down from 19.5 percent in September 2011.

Over the past 12 months, Obion County had the greatest increase in its unemployment rate (up 6.2 percentage points), while the largest unemployment rate decline was in Hardeman County (down 2.1 percentage point).

The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data is based on the 2010 benchmark.

Total nonfarm employment increased by 600 jobs from September 2011 to October 2011. There were seasonal increases in educational/health services (up 800 jobs) and local government (up 200 jobs). This was partially offset by declines in professional/business services (down 300 jobs) and nondurable goods manufacturing (down 200 jobs).

During the past 12 months, nonfarm employment (due to rounding) remained unchanged. During that time, goods-producing jobs decreased by 700, while service-providing jobs increased by 800.

Knoxville MSA - Anderson, Blount, Knox, Loudon, Union

Total nonfarm employment increased by 1,200 jobs from September 2011 to October 2011. There were seasonal increases in local government (up 1,100 jobs), professional/business services (up 700 jobs), durable goods manufacturing (up 300 jobs), and mining/logging/construction (up 200 jobs). This was partially offset by declines in leisure/hospitality (down 700 jobs) and educational/health services and state government (both down 200 jobs).

Over the past 12 months, nonfarm employment increased by 1,200 jobs. During that time, goods-producing jobs increased by 1,000, while service-providing jobs increased by 200.
