

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received a request for modification of their air contaminant source as noted below. The proposed modification is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Columbia Gulf Transmission Company, Hartsville Compressor Station with a mailing address of P.O. Box 1273, Charleston, WV 25325. They seek to obtain an air contaminant permit (Division identification number: 56-0004-01/62364) for installation of two (2) gas turbine compressors and two (2) new gas fired emergency generators at their natural gas compressor station located at 5422 Green Grove Road, Hartsville, TN 37074. The new Solar Titan gas turbine compressor is rated at 28,500 horsepower hp (ISO), the rebuilt Pratt & Whitney gas turbine compressor is rated at 16,000 hp, and the new Waukesha gas fired internal combustion emergency generators are rated at 880 hp and 440 hp. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. Srinu Kusumanchi is the assigned Division person.
