

New Source Review newspaper advertisements for construction permit applications, March 5, 2009. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: March 3, March 4, or March 5, 2009. Public notices are generally published every two weeks. The previous publication of public notices was February 19, 2009.

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction and/or modification of air contaminant sources as noted below. The proposed construction and/or modification is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is AHC Clarksville with a mailing address of 310 Dover Road, Clarksville, TN 37042. They seek to obtain an air contaminant permit (Division identification number: 63-0074-09/62668) for construction of a Boiler Operation located at the same address. This proposed operation would consist of one (1) natural-gas fired boiler. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Ms. Elizabeth Peeler is the assigned Division person.

For the Montgomery County *Leaf-Chronicle* – published once March 3, 2009.

The applicant is Universal Well Services, Inc. with a mailing address of 190 Longfield Road, Lake City, TN 37769. They seek to obtain an air contaminant permit (Division identification number: 01-0239-04/62626) for construction of a sand storage silo located at the same address. This proposed operation would consist of a storage silo and associated equipment used for transferring material for storage. A dust filtration system/settling chamber would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Ms. Hymelia Craig is the assigned Division person.

For the Anderson County *Oak Ridger* -- published once on or before Thursday, March 5, 2009.

The applicant is Talley Construction, dba Southeastern Materials, Inc., with a mailing address of 1751 McFarland Ave., Rossville, GA 30741. They seek to obtain air contaminant permits for construction or modification of air contaminant sources at 3854 Bates Pike, Cleveland, TN 37323, as follows:

(1) Asphalt Plant (Division identification number: 06-0108-01/62644). This existing operation consists of an asphalt drum mixer, hot mix asphalt cement storage, conveyors, aggregate stockpiles and associated equipment to produce hot mix asphalt. A baghouse is used for the control of particulate (TSP) emissions. The requested

modification is to renew the existing operating permit for the operation and to apply the State's new standard requirements for asphalt plants. This would decrease total air contaminant emissions, however carbon monoxide would increase due to application of the current EPA emission factors for drum-mix asphalt plants. There would be no physical construction. Mr. H. Flores is the assigned Division person.

(2) Generator (Division identification number: 06-0108-04/62643). This proposed operation would consist of an electric generator powered by a diesel internal combustion engine used to provide power for an existing permitted asphalt plant. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. H. Flores is the assigned Division person.

For the Bradley County *Cleveland Daily Banner* -- published once on or before Thursday, March 5, 2009.

The applicant is Wayne County Rock with a mailing address of P.O. Box 189, Waynesboro, TN 38485. They seek to obtain an air contaminant permit (Division identification number: 91-0067-01/62628) for a rock crushing operation located at 1800 Savannah Hwy, Waynesboro, TN. The proposed modification would consist of replacing existing equipment with a portable unit. There would be physical construction. Regulated air contaminants would be emitted by this source. Wet suppression is used for pollution control of particulates. Mr. Thomas Krinov is the assigned Division person.
