

## PUBLIC NOTICE

Nissan North America, Inc. has applied to the Tennessee Air Pollution Control Division (TAPCD) for a [major source operating permit](#) subject to the provisions of paragraph 1200-3-9-.02(11) of the Tennessee Air Pollution Control Regulations (also frequently referred to as Title V regulations). A major source (Title V) operating permit is required by both the Federal Clean Air Act and the Tennessee Air Pollution Control Regulations.

The applicant is Nissan North America, Inc. with a site address of 983 Nissan Drive, Smyrna, Tennessee 37167. They seek to obtain a major source operating permit for their automobile assembly plant. However, it should be noted that this facility has current state operating permits.

EPA has agreed to treat this draft Part 70 permit as a proposed Part 70 permit and to perform its 45-day review provided by the law concurrently with the public notice period. If any substantive comments are received, EPA's 45-day review period will cease to be performed concurrently with the public notice period. EPA's 45-day review period will start once the public notice period has been completed and EPA receives notification from the Tennessee Air Pollution Control Division that comments have been received and resolved. Whether EPA's 45-day review period is performed concurrently with the public comment period or after the public comment period has ended, the deadline for citizen's petitions to the EPA Administrator will be determined as if EPA's 45-day review period is performed after the public comment period has ended (i.e., sequentially).

The status regarding EPA's 45-day review of this project and the deadline for submitting a citizen petition can be found at the following website address:

Nissan North America, Inc. has also applied to the TAPCD for fourteen construction permits for fourteen separate sources. However, it should be noted that this facility has current state operating permits for these fourteen sources. These construction permits are being issued to remove one requirement and add a different requirement. The issuance of these construction permits will precede the removal of the current state operating permits from the State Implementation Plan (SIP).
