

Green Activities in the Community McDonald School

Every year our TSAP Club raises money for air pollution credits with the Clean Air Conservancy. We are now a Partner school with the CAC.

We do water quality monitoring with TVA in the Nolichucky River every spring.

We partner with Keep Greene Clean for America Recycles Day, Earth Day, and the Great American Clean-up when we pick up litter on our school grounds.

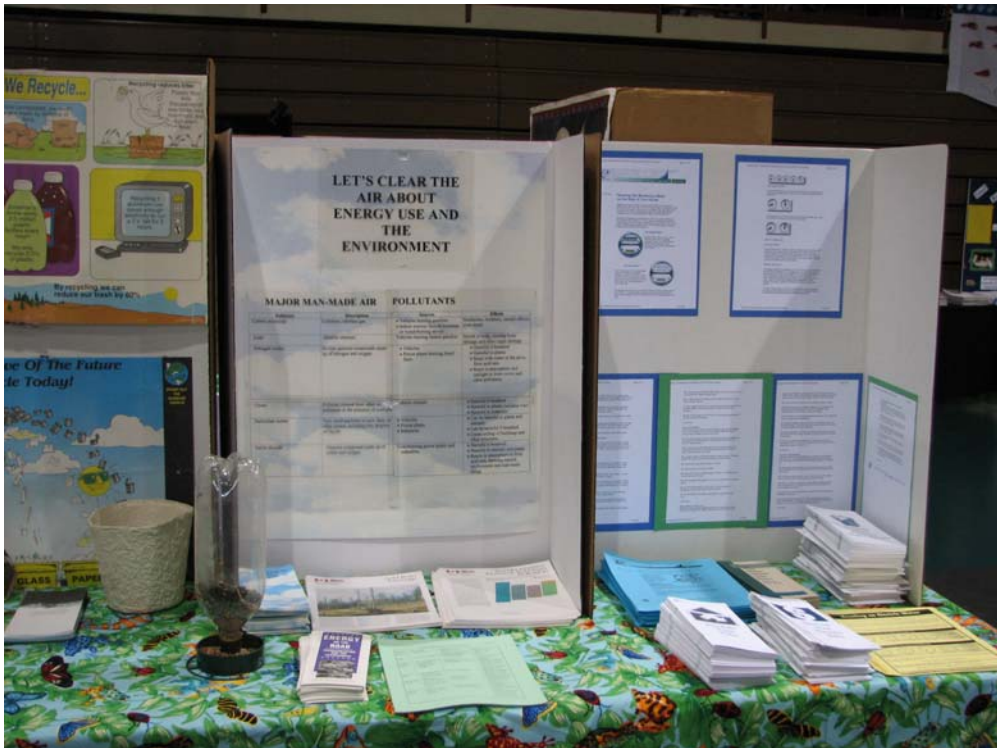

We advertise and promote the county Household Hazardous Waste Day each year.

The county sponsors the annual Parenting Fair, where we have displays and give away environmental information on household hazardous waste, energy conservation, recycling, and air pollution.

Food City donated plastic grocery bags for us to decorate with energy conservation tips. As people would stop by, many would take a bag to put their “freebies” in from the various booths. We made over 150 bags. They were gone in less than two hours. The recycling display gives ideas to reuse paper and plastic.

This display educates about the connection between energy use and air pollution. The next display shows energy conservation tips that everyone can use.
