## **2012**

Tennessee Department of Agriculture  
Division of Forestry  
P. O. Box 40627  
Melrose Station  
Nashville, Tennessee 37204

Published in cooperation with:

United States Forest Service  
Southern Research Station  
Forest Inventory & Analysis  
Knoxville, TN 37919

## Foreword

We often see the beauty of the forest but do not always realize the tremendous contribution that trees make to our lives for recreation, clean air and water, homes for wildlife and the general well being for every citizen of Tennessee. Our Tennessee forests also play a major role in the Tennessee economy for forest landowners, the forest industry and Tennessee employees and provide a wide range of products for our everyday use. If our forests continue to be treated properly as they are today, they will be able to be utilized by generations to come.

Primary forest products industries use roundwood, or logs and convert it into a product such as hardwood lumber or paper. A secondary processor uses the primary product and adds value or processes it further; for example they may manufacture furniture from hardwood lumber.

This is a directory of the primary and secondary forest products using industries that are located in the state of Tennessee. The purpose of the directory is to help bring together potential customers, suppliers and manufacturers of forest products in the state and outside of Tennessee as well.

The information in the directory is possible through the cooperation of the Tennessee forest industry who supply data to the many Division of Forestry foresters and technicians who gather the data from the hundreds of facilities across the state. We all have tried to make every effort to be accurate and complete, however, if errors are found please contact Debra Dawson at the Department of Agriculture, Division of Forestry in Nashville, 615- 837-5540 or email to [debra.dawson@tn.gov](mailto:debra.dawson@tn.gov) so we can correct the information.

This has been a cooperative project between the U. S. Forest Service, Southern Research Station, Forest Inventory and Analysis and the Tennessee Department of Agriculture, Division of Forestry and the data collected in 2012 is for the production year 2011.
