- IV. Enforcement Summary**

Fy 15-16 Annual Report on the Quality of Kerosene and Motor Fuel in Tennessee

Executive Summary

The Kerosene and Motor Fuels Quality Inspection Act, T.C.A. 47-18-1301 et seq., was signed into law in 1989. Under this law, the Commissioner of Agriculture is charged with establishing and administering a fuel quality inspection program to ensure that kerosene and motor fuels conveyed for consumption in Tennessee are labeled and posted in accordance with federal and state law, and meet applicable standards established by the ASTM International, formerly the American Society for Testing and Materials. This law was created in response to a 1988 statewide survey of fuel quality in Tennessee conducted by the Department of Agriculture. In this survey, approximately 30 percent of the samples tested failed to meet either the labeled declarations or the minimum ASTM standards.

The program implementation proved to be very successful. Within two years of administering the Act, the overall fuel compliance rate increased to a little more than 98 percent—a dramatic change from the results of the pre-program survey and the first year of implementation. This is demonstrated in the graph located within this report titled Annual Sample Violation Summary. When viewing this graph, note the spike in violations beginning in FY 2008 through FY 2010. This spike represents the introduction of alternative fuels into the Tennessee market. The majority of the increases in violations can be attributed to fuel dispenser labeling requirements. Tennessee rules require that fuels containing oxygenated compounds, such as ethanol, be labeled as such for consumer information.

We are pleased to note that our routine surveillance of biodiesel has continued to demonstrate marked improvements. The introduction of alternative fuels in FY 2008 included the influx of biodiesel and biodiesel-blended fuels. At that time, the processing of biodiesel had not been refined to ensure that all biodiesel products consistently met ASTM specifications. Improvement of the production methods led to fewer violations. FY 2014 started a decreasing trend in biodiesel violations that has continued; routine testing of biodiesel blendstock found no violations in 2016. This past year, the department achieved an overall compliance rate of 96 percent for all fuel products tested. This high compliance rate indicates that Tennesseans can expect the highest quality in transportation and heating fuels.

The quality assured under the Kerosene and Motor Fuels Quality Inspection Act continues to provide Tennessee with the confidence that every fuel purchase provides a product that is fit-for-purpose and satisfies the requirements of their equipment.

A handwritten signature in blue ink that reads "Jai Templeton". The signature is written in a cursive, flowing style.
