Committee Descriptions

For more information please refer to the TC2 by-laws found on our website: www.tncancercoalition.org

Standing Committees

Advocacy: Develop and promote an advocacy agenda that educates consumers and professionals about the cancer burden in Tennessee; advocates for necessary changes that reduce cancer burden; and keeps Executive Committee and Membership up-to-date on legislative and public policy matters.

Disparities: Monitor and assist in the provision of access to cancer education, prevention, detection, and treatment for disparate populations; assist in outreach services; and recruit members representing disparate populations to participate in TC2.

Health Literacy: Assist with the development and delivery of public health information on cancer topics in coordination with the Marketing Committee.

Internship: Disseminates information on internship opportunities with coalition members and academic institutions statewide for fall, spring, and summer internship opportunities. Through a peer review process, student applications are reviewed and matched with student intern project requests.

Marketing: Promotion of the Coalition and its activities; review and update TC2 website; and review annual reports and other publications about the Coalition and State Plan prior to finalization.

Membership: Develop the membership of the Coalition by working with the leadership of the regional coalitions to recruit new members; analyze and evaluate areas for special recruitment; and develop, update and provide new members an orientation and packet.

Summit: Plan, promote, and present the annual TC2 Summit in coordination with the Marketing Committee, as directed by the Executive Committee.

Surveillance: Assess, monitor and collect data on cancer rates and screening behaviors; evaluate Coalition activities; and review Interim and Annual reports to the CDC.

Resource Committees

The Resource Committees will provide statewide focus to the cancer issues and assist in developing a regional emphasis on these issues. The Resource Committees are:

Childhood Cancers, Clinical Trials/Genetics, Colorectal Cancer, Hematological Cancers, Lifestyle & Environment, Lung Cancer, Men's Cancers, Palliative Care, Skin/Melanoma, Survivorship, Tobacco and Women's Cancers
