
Transportation, Distribution, & Logistics Standards

The Background:

Rules, Regulations, and Minimum Standards of the State Board of Education 0520-01-03-.05(1) calls for the State Board of Education to adopt curriculum standards for each subject area, grades K-12. The approved standards are to be the basis for planning instructional programs in each local school system.

The Department of Education's Division of Career and Technical Education (CTE) is submitting revisions for the Transportation, Distribution, & Logistics career cluster. These new standards reflect higher expectations for students, as aligned to the Common Core State Standards for English Language Arts & Literacy in Technical Subjects, as well as reflect changes to national industry standards recognized by National Automotive Technicians Education Foundation (NATEF). Upon successful completion of the full collision sequence of courses, students are eligible to receive the Automotive Service Excellence (ASE) Student Certification.

Courses included in this item:

Collision Repair: Estimating and Customer Services	New course
--	------------

The Recommendation:

The Department of Education recommends acceptance of this item on first reading. The SBE staff concurs with this recommendation.
