

# Pumper Driver Operator:

## Skill Sheet Package

Based on *NFPA 1002: Standard on Fire Apparatus Driver/Operator Professional Qualifications*, 2017 Edition.

June 2019

# Certification Criteria

## Pumper Driver Operator

### Certification Requirements

To be issued certification for Pumper Driver Operator, the candidate will:

Show successful completion of the pre-requisite requirements.

- Certified at Fire Fighter I by IFSAC or Pro Board or TN Fire Commission
- **Written Examination:** Perform to a minimum 70% competency on the examination. Tested on NFPA 1002 Chapter 4 and 5 must both be pass at 70% or above. (Retest is allowed after 14 days, within one year of skills completion date.)
- **Practical Examination:** Successfully complete the skills evaluation to a minimum of 70% competency and successful completion of all critical points. Evaluators will test 100% of the skills.

Basis: Tennessee Commission on Firefighting, T.C.A..4-24-101: 0360-03-01-.24-  
Requirements for Certified Pumper Driver Operator

STATE OF TENNESSEE  
DEPARTMENT OF COMMERCE AND INSURANCE  
**COMMISSION ON FIRE FIGHTING**

2161 Unionville Deason Road  
Bell Buckle, TENNESSEE 37020  
931-294-4140

**IN HOUSE PRACTICAL SIGN-OFF SHEET**

This form is to be completed and attached to the Application for Written Examination for practical's in which the fire department is administering an in-house practical. The individual skill sheets completed by the applicant are to be maintained on file within the fire department and are subject to audit by the Commission.

# PUMPER DRIVER OPERATOR

Pumper Driver Operator: Pumper Skill Sheets. These skills meet all the requirements of NFPA 1002, *Standard on Fire Apparatus Driver/Operator Professional Qualifications*, 2017 edition.

**Practical Examination for Certification:** Skills testing will be conducted on the apparatus specific to the certification level using a minimum of 100% of the JPRs listed below. The skills will be administered by an evaluator certified at this level or an expert (Instructor) in this field. For successful completion of the practical examination, a minimum 70% competency (including critical points) is required for certification.

Skill Sheet	Primary Task	JPR(s) Covered
01	Preventive Maintenance – Operational Status of a Fire Department Vehicle - Pumper	4.2.1, 4.2.2, 5.1.2
02	Driving Operations	4.3.1, 4.3.6, 4.3.7
03	Serpentine Exercise	4.3.3
04	Alley Dock Exercise	4.3.2
05	Diminishing Clearance Exercise	4.3.5
06	Confined Space Turn-Around Exercise	4.3.4
07	Produce Effective Hand & Master Streams from an Internal & Pressurized Source	5.2.1, 5.2.2, 5.2.3, 5.2.4
08	Produce Effective Hand & Master Streams from a Static Source	5.2.1, 5.2.2, 5.2.3, 5.2.4
09	Operate a Relay Evolution from Internal Source & Pressurized Source	5.2.1, 5.2.2, 5.2.5
10	Operate a Relay Evolution from a Static Source	5.2.1, 5.2.2, 5.2.5
11	Supply Water to Fire Sprinkler & Standpipe Systems from Pressurized Source	5.2.1, 5.2.2, 5.2.7
12	Supply Water to Fire Sprinkler & Standpipe Systems from Static Source	5.2.1, 5.2.2, 5.2.7
13	Pump a Foam Fire Stream	5.2.1, 5.2.2, 5.2.6
14	Initiate the Response to a Reported Emergency	4.4.1, 4.4.2, 4.4.3, 4.4.3

## PUMPE DRIVER OPERATOR – SKILLS DESCRIPTION

(TO BE USED IN CONJUNCTION WITH PDO SKILLS DIAGRAM)

### Serpentine

**Summary:** The serpentine exercise measures the driver's ability to steer the apparatus in close limits without stopping to change the direction of travel so that the apparatus is maneuvered through the obstructions without striking them. The serpentine course will be simulated using the measurements and diagram provided, along with proper placement of cones. The exercise should be conducted with the apparatus moving first backward, then forward. The course or path of travel for this exercise can be established by placing a minimum of three markers in a straight line. The spacing of the markers should be based on the wheel base of the apparatus used. Adequate space must be provided on each side of the markers for the apparatus to move freely.

**Application:** The driver should drive the apparatus along the left side of the markers in a straight line, and stop just beyond the last marker. The driver should then begin the exercise by backing the apparatus between the markers, passing to the left of marker number 1, to the right of marker number 2, and to the left of marker number 3. At this point, the driver should stop the vehicle, and then drive it forward between the markers by passing to the right of marker number 3, to the left of marker number 2, and to the right of marker number 1.

**NOTE:** For larger vehicles, such as an ARFF apparatus, this course might need to be modified.

### Alley Dock

**Summary:** The alley dock exercise measures a driver's ability to drive past a simulated dock or stall and back the apparatus into the space provided, stopping smoothly. A dock or stall will be simulated using the measurements and diagram provided, along with proper placement of cones and/or barricades.

**Application:** The driver should pass the barricades with the dock on the left and then back the apparatus, using a left turn, into the stall. The exercise should then be repeated with the dock on the right side, using a right turn. The apparatus should be parked within the restricted area without having to stop and pull forward and without striking boundary cones or the rear barricade.

**NOTE:** For larger vehicles, such as an ARFF apparatus, this course might need to be modified.

### Diminishing Clearance

**Summary:** The diminishing clearance exercise measures a driver's ability to steer the apparatus in a straight line through areas of restricted horizontal and vertical clearances, to judge the distances from wheel to object, and to stop at a finish line, so that no obstructions are struck. The diminishing clearance will be simulated using the measurements and diagram provided, along with proper placement of cones and/or barricades. The speed at which a driver should operate the apparatus is optional, but it should be great enough to necessitate quick judgment. The exercise is to be performed both forward and in reverse with a spotter.

**Application:** The driver should maneuver the apparatus through the lane forward without touching the markers, stopping at a finish line beyond the last marker. No portion of the apparatus should protrude beyond the line. The driver should then back the apparatus out of the restricted area without touching the markers. Vertical clearance

judgment should be evaluated using a prop with a crossbar that is adjustable, based on the height of the apparatus.

**NOTE:** During the evaluation, the driver should drive forward and back through the prop with the crossbar at several different heights, including one that is lower than the top of the apparatus. The prop should not be struck. The intent of the vertical clearance judgment is for proper identification of the allowable height of a space relative to the apparatus.

### **Confined Space Turnaround**

**Summary:** The confined space turnaround exercise measures a driver's ability to turn the apparatus around in a confined space without striking obstacles. The confined space will be simulated using the measurements and diagram provided, along with proper placement of cones.

**Application:** The driver should move into the area from the opening in the center of one of the 50 foot legs, turn the apparatus 180 degrees, and return through the opening. There is no limitation on the number of times the driver has to maneuver the apparatus to accomplish this exercise (3-point turn, 5-point turn, etc.), but no portion of the apparatus should extend over the boundary lines of the space.

**NOTE:** For larger vehicles, such as an ARFF apparatus, this course might need to be modified.

Pumper Driver Operator

## Skill Sheet- PDO: 01

The candidate, given a **Fire Department Pumping Apparatus**, its manufacturer's specifications, maintenance and inspection forms, and policies and procedures of the jurisdiction, shall perform and document visual and operational checks on the systems and components specified in the performance steps, so that the operational status of the vehicle is verified and deficiencies are reported.

**Use Maintenance and Inspection Form PDO: 01-A**

**Expected time to complete skill(s) is 25 minutes**

Performance Steps	Test		Retest	
	P	F	P	F
<b>Safely performs the following steps:</b>				
1. Identifies correct hand tools for use during inspection; uses appropriately				
2. Inspects tires, sufficient tread and inflated to manufacturer's specifications - <b>CRITICAL POINT</b>				
3. Inspects batteries as clean, corrosion free, and secured				
4. Inspects engine oil, fluid level within manufacturer's specifications - <b>CRITICAL POINT</b>				
5. Inspects fuel level, fuel above ¾ tank				
6. Inspects coolant fluid level; fluid level is within manufacturer's specifications - <b>CRITICAL POINT</b>				
7. Inspects belts for tightness and excessive wear (engine not running) - <b>CRITICAL POINT</b>				
8. Inspects electrical system, all running and emergency lights are operational, electronic audible devices are operational - <b>CRITICAL POINT</b>				
9. Inspects braking system for air/fluid leaks – <b>CRITICAL POINT</b>				
10. Inspects steering system linkage for wear, fluid level within manufacturer's specifications				
11. Inspects fluid level in transmission, fluid level within manufacturer's specifications - <b>CRITICAL POINT</b>				

**Continued on Page 2**

**This form is to be used in conjunction with Skill Sheet 01**

Apparatus	Date	Mileage
Item	Item Checked	Notes
Visually inspect the exterior of the apparatus for obvious problems or damages.		
<b>Tires</b>		
Tire pressure is within manufacturer's recommended specifications		
Proper tread depth		
<b>Batteries</b>		
Checked water level, if applicable		
Checked tightness of terminals with appropriate hand tool		
Inspected terminals for corrosion		
Evaluated general condition (damage, tie-downs)		
<b>Oil</b>		
Check for leaks		
Ensure engine oil level is within manufacturer's recommended specifications		
Ensure engine oil pressure with engine on is within manufacturer's recommended specifications		
<b>Fuel</b>		
Check fuel gauge level		
<b>Coolant system</b>		
Check for leaks in the cooling system		
Check condition of hoses and/or lines		
Ensure coolant level is within manufacturer's recommended specifications		
<b>Belts</b>		
Inspects all belts for proper tension, excessive wear, breaks or cracking		
Identifies that there are not missing belts		
<b>Electrical system</b>		
Ensure charging system is operational		
Confirm gauges are functioning		
Check ignition system by starting engine

Pumper Driver Operator

## Skill Sheet - PDO: 02

The candidate, given a **Fire Department Pumping Apparatus** and a predetermined route on a public way or simulated route that incorporates the maneuvers and features as specified in the performance steps listed that the driver/operator is expected to encounter during normal and emergency operations, shall operate a fire department pumping apparatus so that the vehicle is operated in compliance with all applicable state and local laws and departmental rules and regulations.

**Expected time to complete skill(s) is 25 minutes**

Performance Steps	Test			
	P	F	P	F
<b>Safely performs the following steps:</b>				
1. Check and adjust driver's seat as needed				
2. Check and adjust vehicle mirrors as needed				
<b>3. Fasten passenger restraint before putting vehicle in motion – CRITICAL POINT</b>				
4. Maneuvers four left turns properly				
5. Maneuvers four right turns properly				
6. Maneuvers urban business street or urban two-lane road properly, 1 mile in length				
7. Maneuvers through three intersections, two that require a complete stop				
8. Maneuvers at least one curve properly (left or right)				
9. Maneuvers railroad crossings properly				
10. Maneuvers entrance and exit to limited access highway properly				
11. Maneuvers two lane changes on limited access highway properly				
12. Maneuvers downgrades steep enough to require downshift/braking properly				
13. Maneuvers upgrades steep enough to require gear changing to maintain speed				
14. Maneuvers through low clearance/bridge properly				
15. Maneuvers on an environmentally affected road surface				
<b>16. Operates vehicle safely and in accordance with applicable laws by maintaining safe following distances, maintaining control of vehicle, and travelling at safe speeds given road/weather/traffic conditions - CRITICAL POINT</b>				
17. Maintains awareness of vehicle gauges and instruments				
18. Deploys, energizes and monitors the system and equipment (equipment and systems include, but are not limited to, electric generation equipment, floodlighting systems, air compressors, air cascade systems, hydraulic rescue tool systems, power reels for air or hydraulic hose)				
19. Recognizes and corrects system problems

Pumper Driver Operator

## Skill Sheet - PDO: 06

The candidate, given a **Fire Department Pumping Apparatus**, a spotter for backing up and an area in which the vehicle cannot perform a U-turn without stopping and backing up, the candidate shall turn the vehicle 180 degrees within a confined space, so that the vehicle is turned 180 degrees without striking obstructions within the given space.

**Expected time to complete skill(s) is 25 minutes**

Performance Steps	Test		Retest	
	P	F	P	F
<b>Safely performs the following steps:</b>				
1. Check and adjust driver's seat as needed				
2. Check and adjust vehicle mirrors as needed				
<b>3. Fasten passenger restraint before putting vehicle in motion – CRITICAL POINT</b>				
4. Maintains normal driving position				
5. Maneuvers the apparatus into the area through an opening				
6. Turns the vehicle 180 degrees				
7. Maneuvers the apparatus back through the opening				
8. No portion of the apparatus extends over the boundary lines of the space at any time				
9. Utilizes mirrors while backing				
<b>10. Utilizes a spotter while backing – CRITICAL POINT</b>				
11. Appropriately judges vehicle clearance				
<b>Candidate must successfully perform 8/11 including ALL CRITICAL POINTS</b>	Score: /11		Score: /11

# Produce Effective Hand & Master Streams from Internal & Pressurized Source

Reference source: NFPA 1002, *Standard for Fire Apparatus Driver/Operator Professional Qualifications*, 5.2.1, 5.2.2, 5.2.3, 5.2.4, 2017 Edition

Pumper Driver Operator

## Skill Sheet – PDO: 07

The candidate, given a **Fire Department Pumping Apparatus**, an internal tank, a pressurized hydrant, master stream device, hand nozzle, 2 ½” discharge hose and 1 ¾” discharge hose, shall produce effective hand or master streams.

**Expected time to complete skill(s) is 15 minutes**

Performance Steps	Test		Retest	
	P	F	P	F
<b>Safely performs the following steps:</b>				
1. Maintain at least three points of contact while mounting/dismounting apparatus				
2. <b>Fastens passenger restraint before putting vehicle in motion – CRITICAL POINT</b>				
3. Positions fire department pumper to operate at a pressurized fire hydrant				
4. <b>Engages parking brake - CRITICAL POINT</b>				
5. Engages pump				
6. <b>Dismounts safely, avoiding traffic and other hazards- CRITICAL POINT</b>				
7. <b>Properly deploys wheel chocks - CRITICAL POINT</b>				
8. <b>Utilizes safety equipment (PPE, reflective vests) – CRITICAL POINT</b>				
9. Deploys traffic control devices				
10. Establishes protected work areas using scene control devices				
11. Pumps from internal source and transitions to external source				
12. Produces effective water stream from pressurized hydrant to master stream device				
13. Produces effective water stream from pressurized hydrant to handheld nozzle				
14. Operates auxiliary cooling system				
15. Calculates friction loss and gallons per minute for each scenario given				
16. Assembles hose lines, nozzles, valves and appliances as necessary				
17. Operates pressure control system				
18. Performs assigned tasks only within protected work areas.				
<b>Candidate must successfully perform 13/18 including ALL CRITICAL POINTS</b>	Score: /18		Score: /18

**Note to Evaluator(s):** By your signature above, you verify that you are qualified to serve as an Tennessee Fire Commission Evaluator, have followed TFFC Testing Policies and have witnessed that the above candidate has tested the above skills in their entirety.

**Note to Student:** Skill will end when you state or indicate to the evaluator that you have completed all the identified steps. Notify the evaluator at **ANY** time that you have a safety concern.

# Initiate the Response to a Reported Emergency

Reference sources: NFPA 1002, *Standard on Fire Apparatus Driver/Operator Professional Qualifications*, 4.4.1.,4.4.2.,4.4.3.,4.4.4, 2017 Edition

pumper Driver Operator:PDO

## Skill Sheet- PDO-14

The candidate shall demonstrate the procedures for reporting an emergency, utilizing departmental SOP's for taking and receiving alarms, radio codes or procedures, and information needs of dispatch center. Upon learning of a reported emergency you will demonstrate the proper procedures for reporting an emergency, departmental SOP's for taking and receiving alarms, radio procedures, and information needs of the dispatch center.

**Expected time to complete skill(s) is 10 minutes**

Performance Steps	Test		Retest	
Safely performs the following steps:	P	F	P	F
1. Operate fire department communications equipment..				
2. Demonstrates department SOP's of taking and receiving alarms.				
3. <b>Demonstrates the ability to relay information.D.-CRITICAL POINT</b>				
4. Demonstrate the ability to record information.D				
5. Demonstrates the ability to operate fire station telephone and intercom equipment.				
6. <b>Demonstrates the ability to operate radio equipment and discriminate between routine and emergency traffic. CRITICAL POINT</b>				
7. Demonstrates the ability to activate emergency procedures in accordance with departmental SOP's.				
<b>Candidate must successfully perform 5/7 including ALL CRITICAL POINTS</b>	<b>Score: /7</b>		<b>Score: /7</b>
