

Medicare Part D

Since October 1, 2005, marketing for the new Medicare prescription benefit, Medicare Part D, has been permissible. According to the Centers for Medicare and Medicaid Services (CMS), only state-licensed insurance producers may engage in marketing activity. The Medicare Modernization Act does not preempt producer licensing laws. Thus, state law and regulatory provisions regarding producer activity apply to the marketing of Medicare Part D.

In Tennessee we currently have 26 companies that are offering this type of coverage. Some of these entities are licensed with our state and others have had the licensing requirement waived by CMS during the initial trial period.
