Subject: Camden Update 10-30-2017

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 10/21 through Friday 10/27. My previous update covered the period through Friday 10/20.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- No Industrial Waste Cell leachate shipped off-site for disposal (waiting on results of analytic testing)
- Treated Industrial Waste Cell leachate to prepare for off-site disposal
- Installed valves on the gas system header piping and lateral lines to better distribute vacuum
- Cleaned Industrial Waste Cell sump riser pipes as well as Industrial Waste Cell dual-walled leachate force main (using industrial jetter)
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Continuing site clean-up and housekeeping activities
- Continued clay placement on temporary Aluminum Processing Waste cell cover to repair areas with small desiccation cracks
- Continued engineering work on the Industrial Waste Cell closure design
