**Subject:** Camden Update 5-20-2019

Dear Camden Citizens–

Below is a summary of items that have occurred at EWS from Saturday 5-11-2019 through Friday 5-17-2019. My previous update covered the period through Friday 5-10-2019. Thank you.

Pat.

- Aluminum Processing Waste Cell leachate was shipped off-site for disposal.
- Industrial Waste Cell leachate continued to be treated and stored prior to sending off-site for disposal.
- Performed routine daily gas system operation and maintenance activities.
- Performed daily ammonia monitoring.
- Closure Construction Activities Performed:
  - Activities at Aluminum Processing Waste Cell:
    - Contractor began placement of sand infill on existing Closure-Turf areas (approximately 25% complete).
    - Contractor completed installation of Hydrobinder (storm water channel protection) on Closure Turf storm water channels.
    - Contractor completed installation of vegetative layer (straw placement and seeding scheduled to begin next week).
    - Contractor completed connection of passive gas vent piping. Active gas management unit removed from service; new passive system is operational.
    - Contractor installed rip-rap at base of cell (above liner geocomposite drainage termination).
  - Activities at Industrial Waste Cell:
    - Contractor began installation of protective cover on certified lined areas (approximately 20% complete).
    - Contractor continued to work on completing clay layer and installing base liner extension in the area where the old haul road existed.
  - General Site Construction Activities:
    - Contractor continued to remove haul road between the Aluminum Processing Waste Cell and the Industrial Waste Cell in preparation to complete storm water drainage channel between the cells (approximately 90% complete).
    - Fence contractor continued installation of perimeter fencing (approximately 40% complete).

- Weekly construction meeting held.
