Course #103

Cross Connection Control Repair Workshop

This course will teach participants how to repair backflow prevention assemblies made by various manufacturers. Detailed information will be provided on the maintenance and repair of reduced pressure principle assemblies and double check valve assemblies.

It is intended for individuals who are involved in backflow prevention programs, plumbers, employees of industries and institutions, irrigation personnel, and fire protection system personnel. Any individuals interested in backflow prevention assemblies are welcome to attend. However, the course is designed for certified backflow testers.

General Topics

- ▶ Repair of varying sized assemblies ranging from 3/4" to 10"
- ▶ Explanation of assembly components & parts used in repair
- ▶ Complete repair of device and tools needed
- ▶ When to repair & when to replace
- ▶ What should be replaced when a device fails
