Course #307

Coagulation & Flocculation Workshop

This course discusses methods to improve coagulation and flocculation, and incorporates hands-on laboratory instruction to give students a firsthand experience with jar testing. A student study guide will be provided at the beginning of class.

It is intended for individuals who are currently working toward obtaining a grade 3 or 4 water treatment certification. **There is a prerequisite of attending an Introduction to Water Treatment course.**

General Topics

- ▶ Coagulation & Flocculation Theory
- ▶ Coagulation/Jar Test Math
- ▶ Jar Test Planning
- ▶ Turbidimeters

Operating Experience

Grades 3 or 4 water treatment:
three (3) months

Continuing Education

Grades 3 or 4 wastewater treatment:
twelve (12) hours

Board Sanctioned Training: 18 hours
