Course #401

Introduction to Collection Systems

This course is an introduction to the operation and maintenance of the collection system. The student will gain an understanding of the various components and processes used to operate a collection system and become familiar with State of Tennessee regulations. A student study guide will be provided at the beginning of class.

It is intended for individuals who are currently working toward obtaining a certification in collection systems and for certified collection system operators who want to have a better understanding of collection system processes.
